UX / UI DESIGN · LEARNING APP

ParsiTalk

پارسی‌تاک

A web app that teaches Persian through stories, voice, calligraphy and culture — designed for Iranian children growing up abroad and anyone drawn to the language.

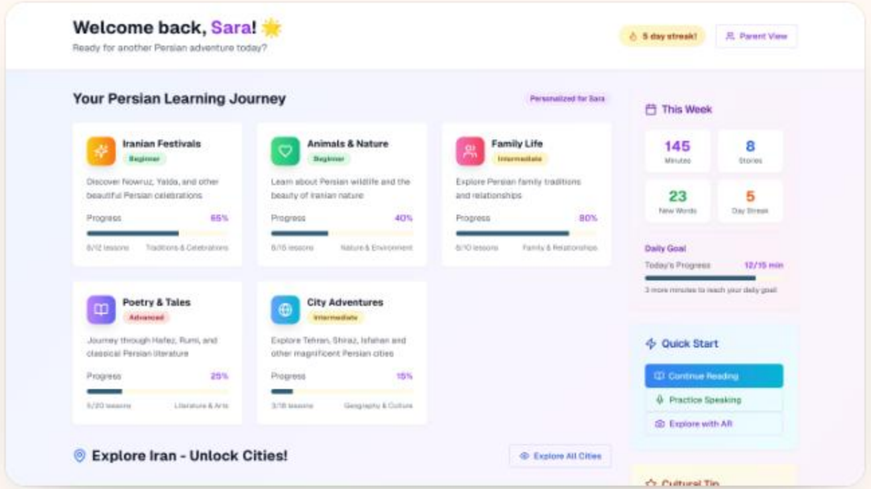

PRODUCT CONCEPT · UX FLOWS · UI SYSTEM · INTERACTIVE PROTOTYPE

BEFORE YOU START

How to read this file

Seventeen boards in four parts. The order follows a learner's path: who they are, how they arrive, what they do every day in the app, and the system that holds it all together.

01 – 03 **Introduction**
The idea, the people it is for, and the brief.

04 – 06 **Structure**
Onboarding, the map of the product, and the landing page.

07 – 13 **The experience**
Dashboard, stories, voice, calligraphy, exploring Iran, the community and the parent view.

14 – 17 **System**
Colour, type and components, mobile, and credits.

01 — THE IDEA

Learning a heritage, not just a language

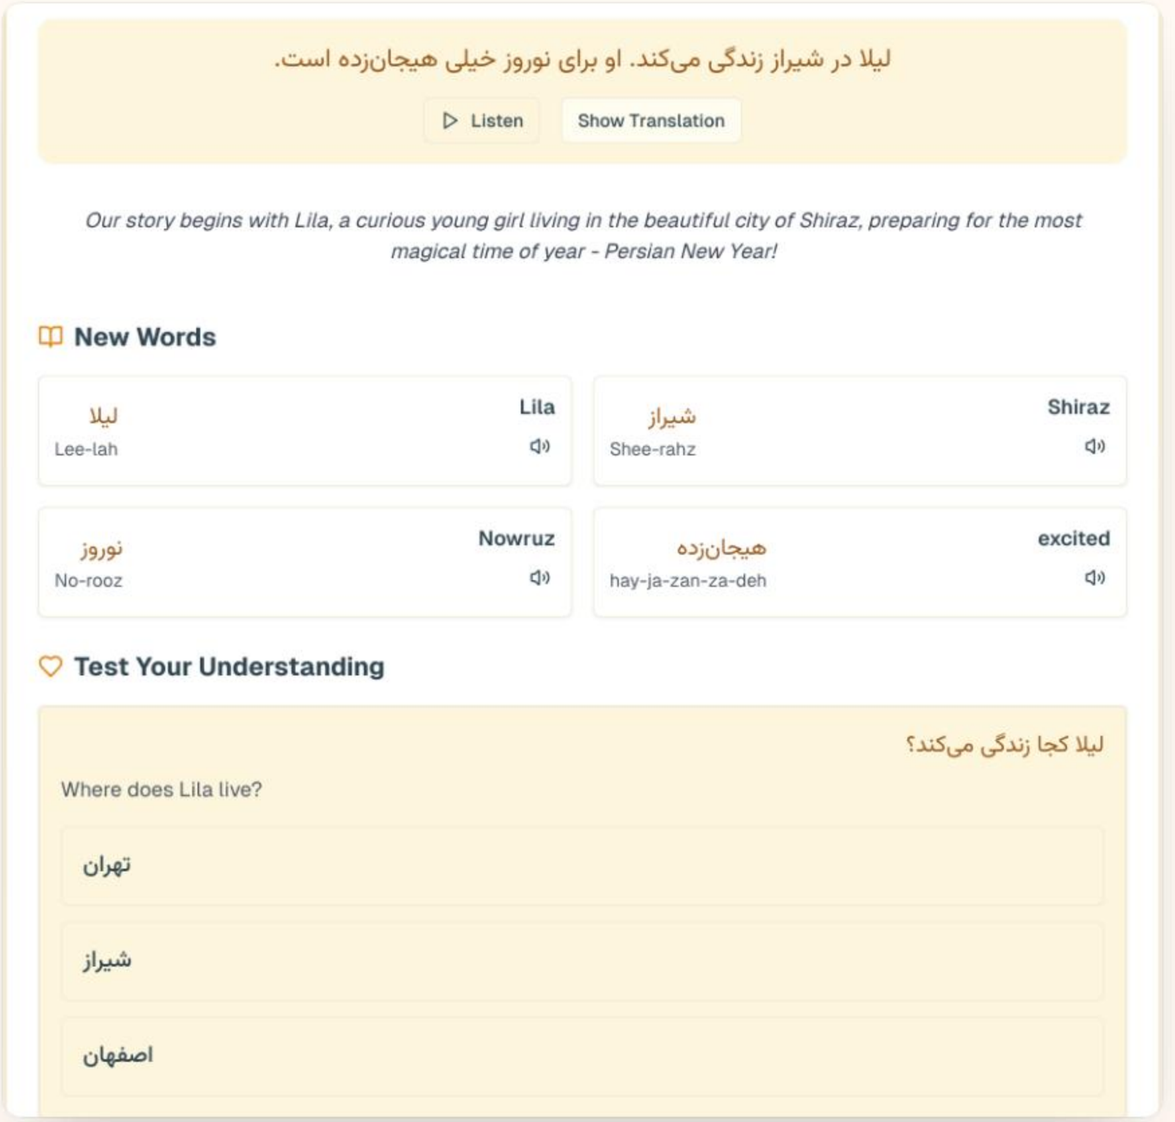

Many children of Iranian families grow up hearing Persian at home but rarely reading, writing or speaking it with confidence. Vocabulary drills don't give them a reason to care.

ParsiTalk teaches Persian through the things that make it worth learning: stories set in real Iranian cities, festivals like Nowruz and Yalda, poetry by Hafez and Rumi, family words and food. Every lesson is wrapped in culture, and every word can be heard, spoken and written.

01 **Stories first**
Language arrives inside a narrative, with a reason to understand it.

02 **Hear it, say it, write it**
Listening, an AI voice coach and calligraphy tracing for every word.

03 **Belonging**
A safe community and a map of Iran to explore, so learning feels like coming home.

02 — WHO IT'S FOR

Three kinds of Persian learner

The same app has to work for an 8-year-old in Toronto, a teenager looking for identity, and an adult who fell for Rumi. The design separates them from the very first screen, then adapts content, tone and level.

Diaspora Kids

Born abroad but want to connect with their Persian roots through stories and culture.

Story-led, playful, guided by a parent

Second-Gen Teens

Seeking a deeper cultural connection and identity through immersive Persian experiences.

Identity, community, voice

Global Learners

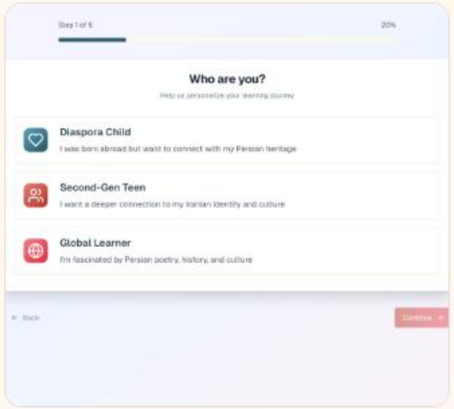

Fascinated by Persian poetry, history and culture — learning in a fun, engaging way.

Poetry, history, culture

03 — ONBOARDING

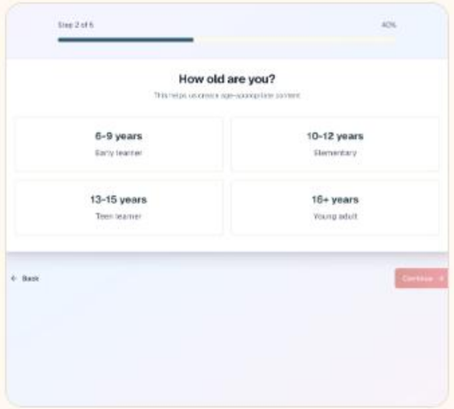

Five questions, one personal path

Instead of a sign-up form, the app asks five friendly questions — who you are, your age, your level and what you want from Persian — and builds a learning profile from the answers. A progress bar keeps the flow short and clear.

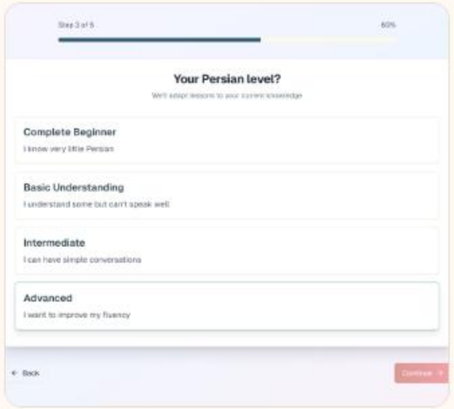

STEP 1

Who are you?

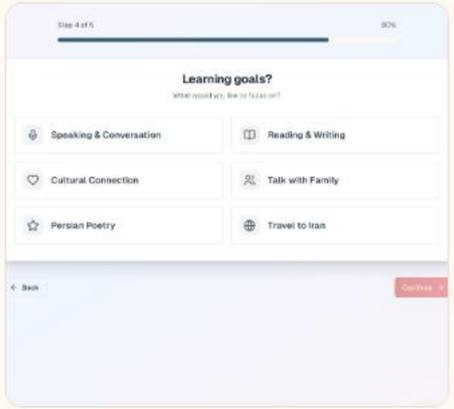

STEP 2

How old are you?

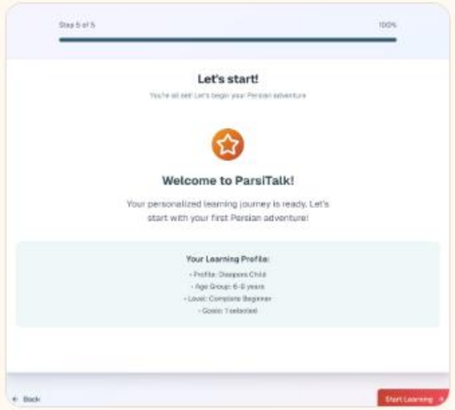

STEP 3

Your Persian level?

STEP 4

Learning goals?

STEP 5

Let's start!

04 — PRODUCT MAP

One home, four directions

Landing page
Story, features, audiences

→

Onboarding
Five questions → profile

→

Dashboard
Journey, streaks, daily goal, quick start

LEARN

Stories
Bilingual scenes, new words, quiz

Story Adventures
Chaptered cultural quests

Listen & Repeat
Words, phrases, songs, poetry

PRACTISE

Voice Coach
AI pronunciation feedback

Calligraphy
Trace letters stroke by stroke

ParsLingua
Persian–English dictionary

EXPLORE

Explore Iran
Unlock cities on a map

AR Explorer
Find Persian objects around you

ParsiWorld
Safe community for kids

PARENTS

Parent Dashboard
Progress, insights, tools

Every feature is one tap from the dashboard and returns to it — no deep menus.

05 — LANDING PAGE

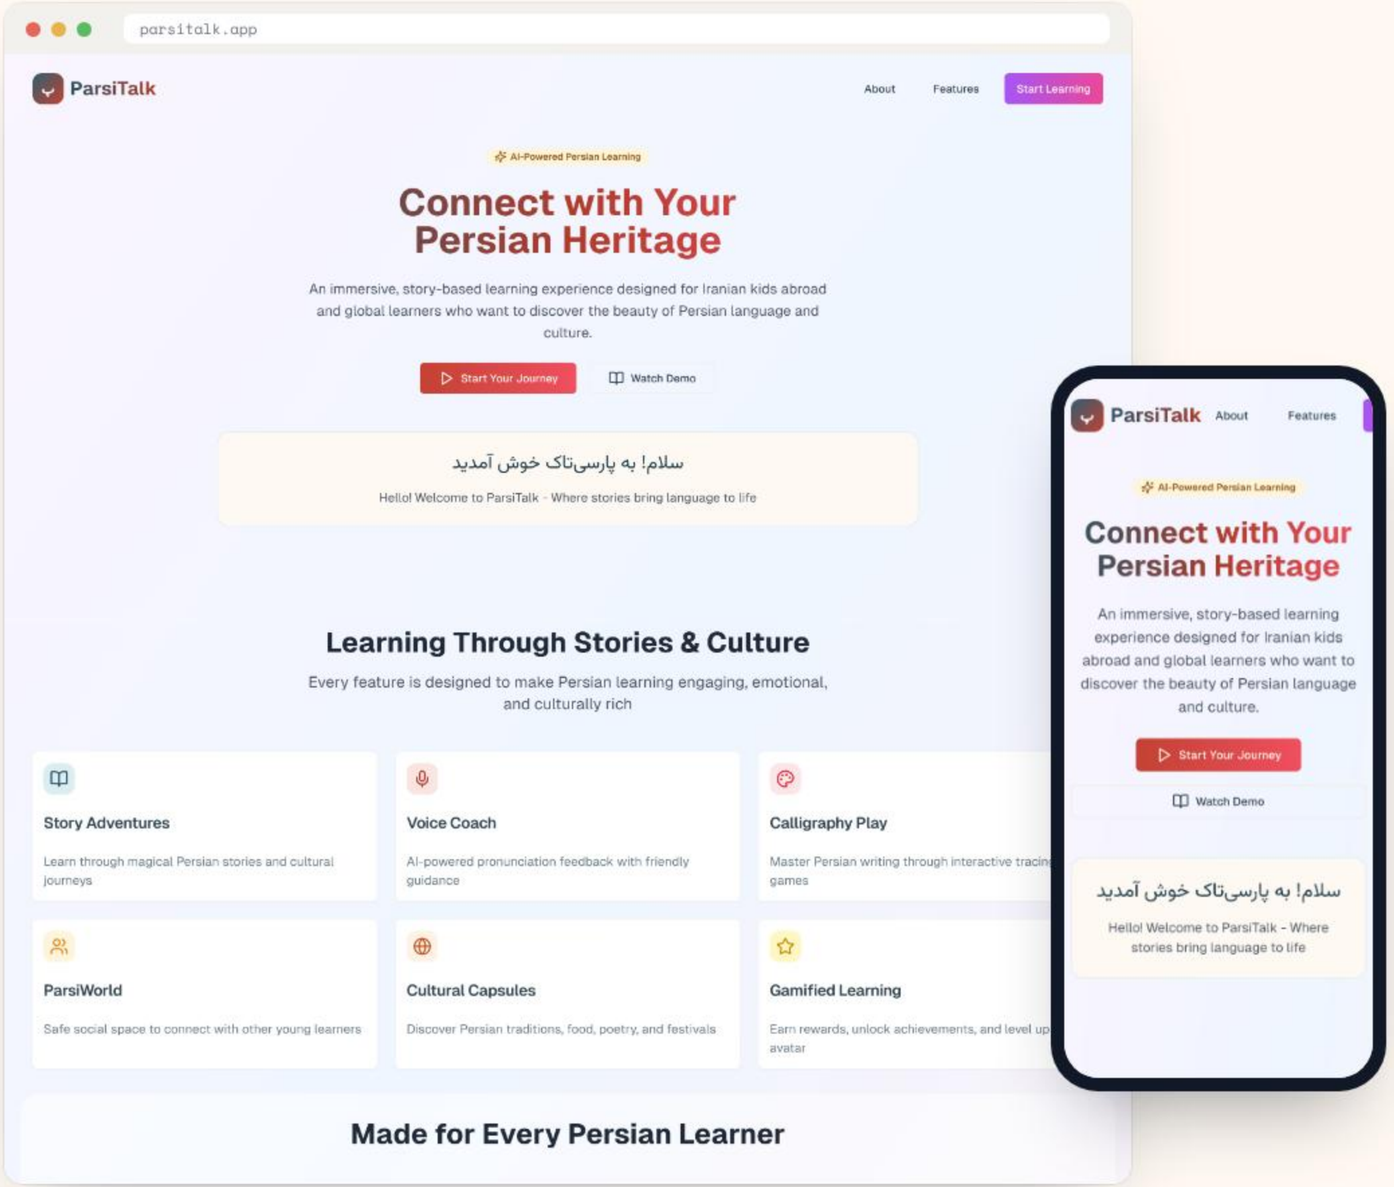

Welcome in two languages

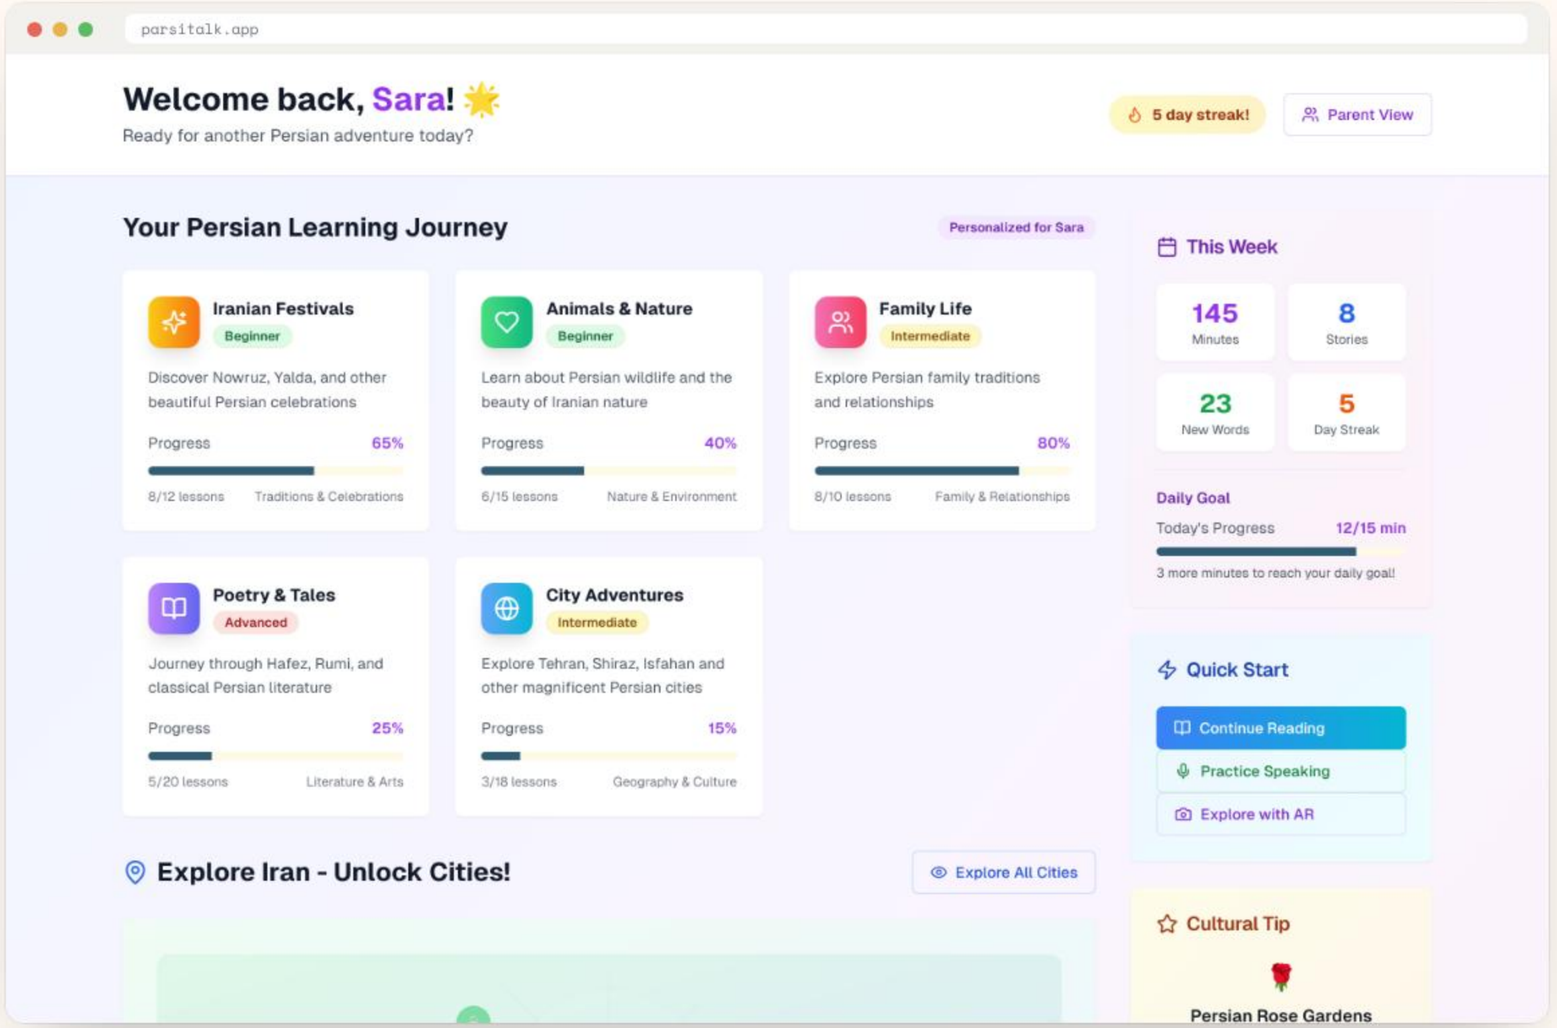

The landing page opens on the emotional promise — “Connect with Your Persian Heritage” — and greets visitors in Persian and English side by side. It then shows the six learning features and names the three audiences directly, so every visitor finds themselves on the page.

01 **Promise**
Heritage first, method second

02 **Proof**
Six features, each in one line

03 **Recognition**
Three learner types, one call to action

06 — DASHBOARD

A journey, not a syllabus

The home screen shows learning as themed journeys — Iranian Festivals, Animals & Nature, Family Life, Poetry & Tales, City Adventures — each with its level and progress.

01 **Daily goal & streak**
Small, visible wins every day

02 **Quick start**
Continue reading, speaking or AR in one tap

03 **Cultural tip**
A fact about Iran on every visit

07 — STORIES

Every scene teaches

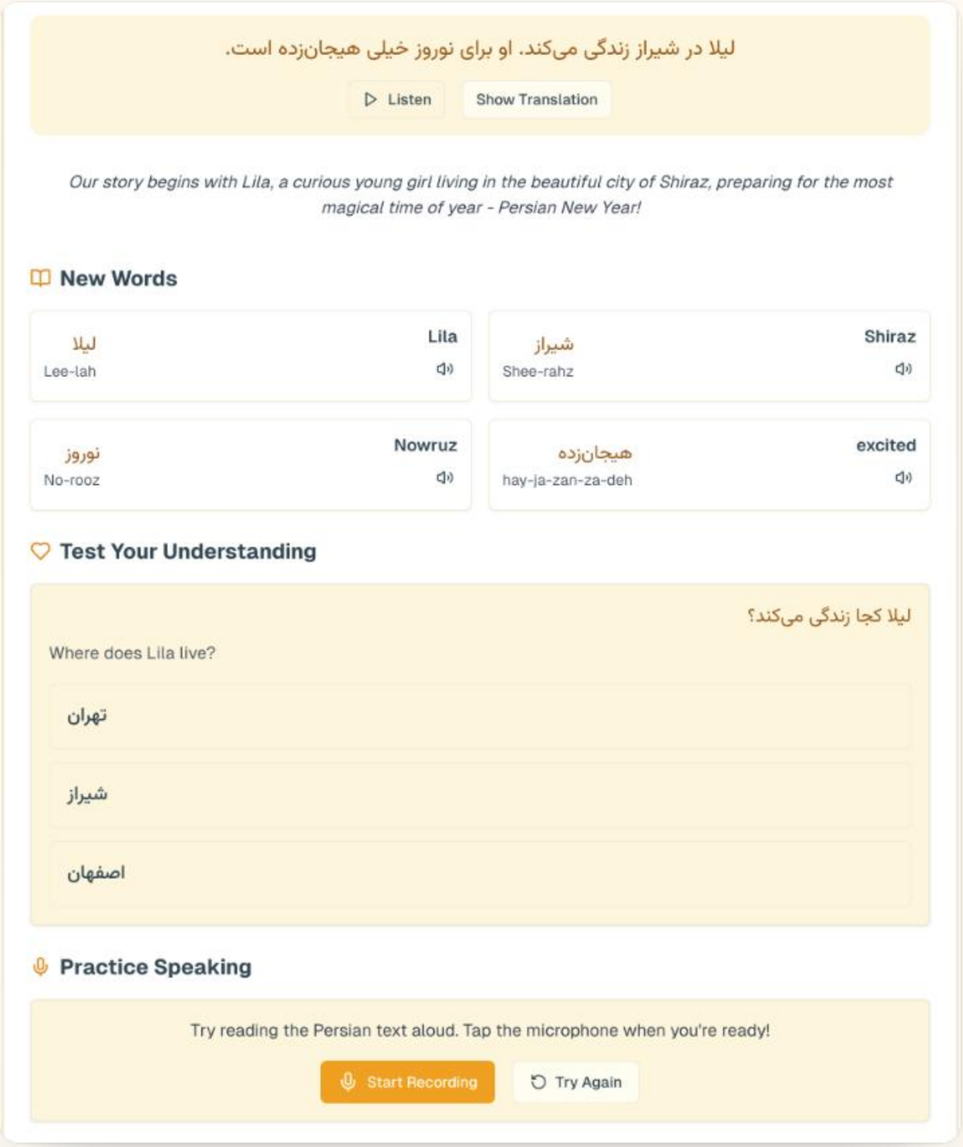

A story like “Lila's Nowruz Adventure” follows a girl in Shiraz getting ready for the Persian New Year. Each scene combines everything a learner needs in one card:

01 **Persian sentence**
With Listen and Show Translation

02 **New words**
Persian, English and how to say it, with audio

03 **Test your understanding**
A question written in Persian

04 **Practise speaking**
Read the scene aloud and record it

08 — VOICE COACH

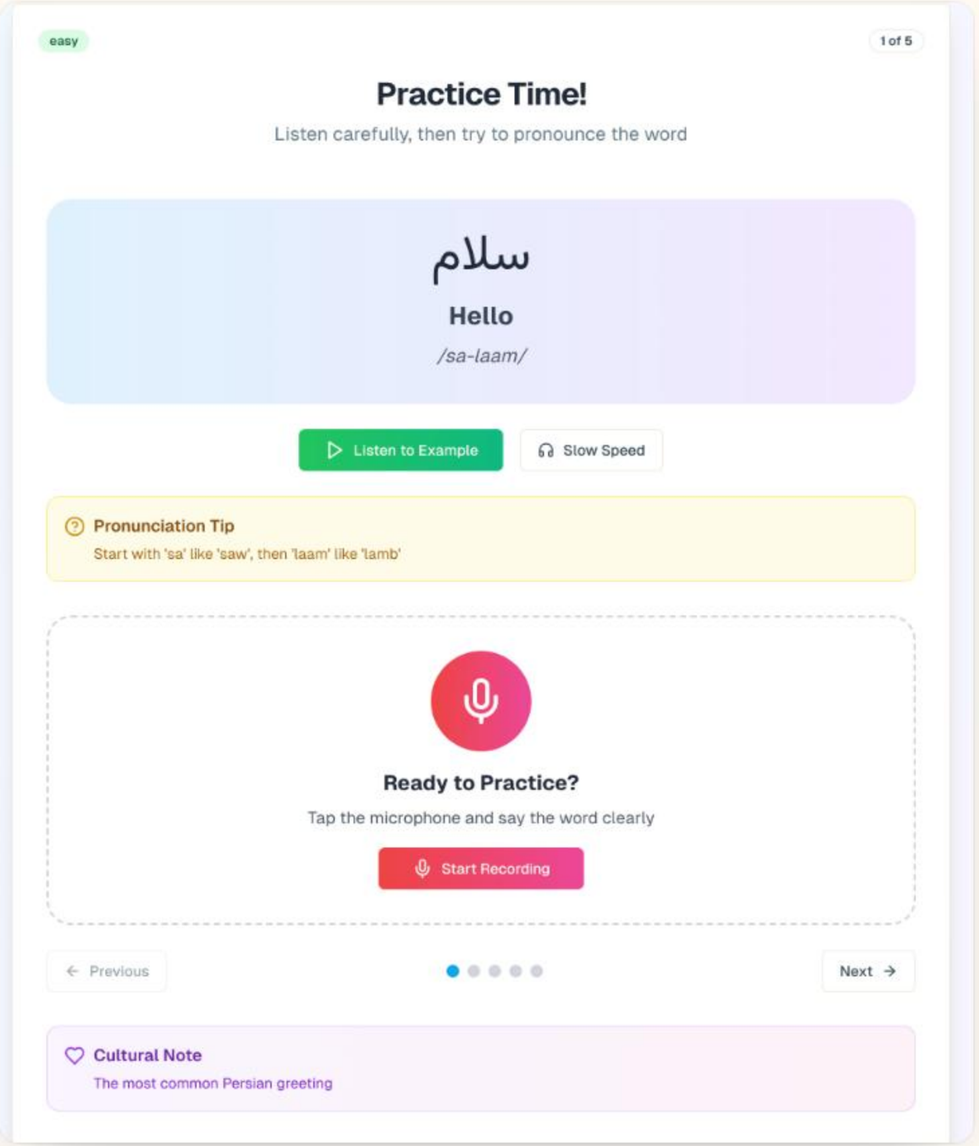

Say it out loud

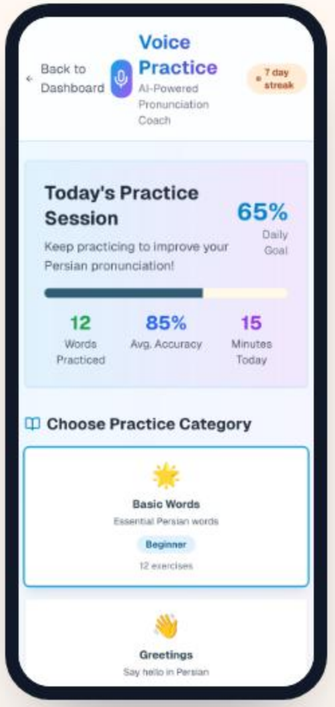

Pronunciation is where heritage learners feel most unsure. The voice coach shows each word in Persian script, English and transliteration, plays an example at normal or slow speed, and gives a friendly tip before the learner records.

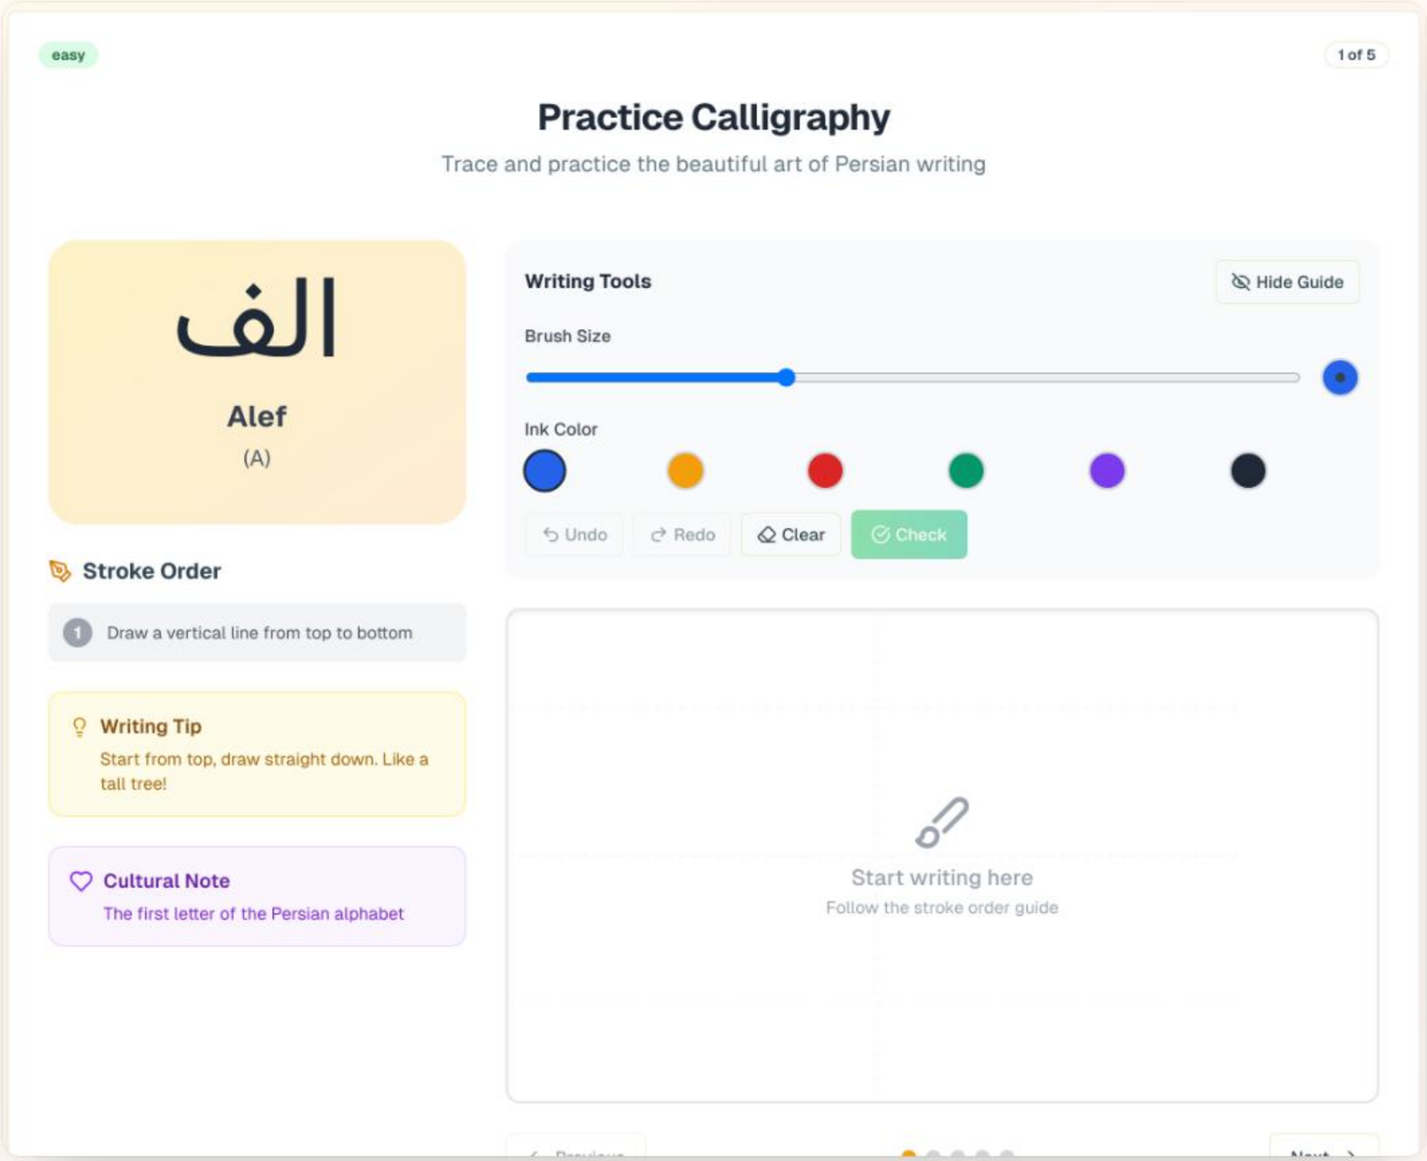

01 **Categories**
Basic words, greetings, family, colours, poetry, phrases

02 **Session stats**
Words practised, accuracy, minutes

03 **Cultural note**
Every word comes with where and how it is used

09 — CALLIGRAPHY

Write it by hand

Learners trace Persian letters and words on a canvas, guided by stroke order. Brush size and ink colour make it feel like play; a writing tip and a cultural note sit beside each letter.

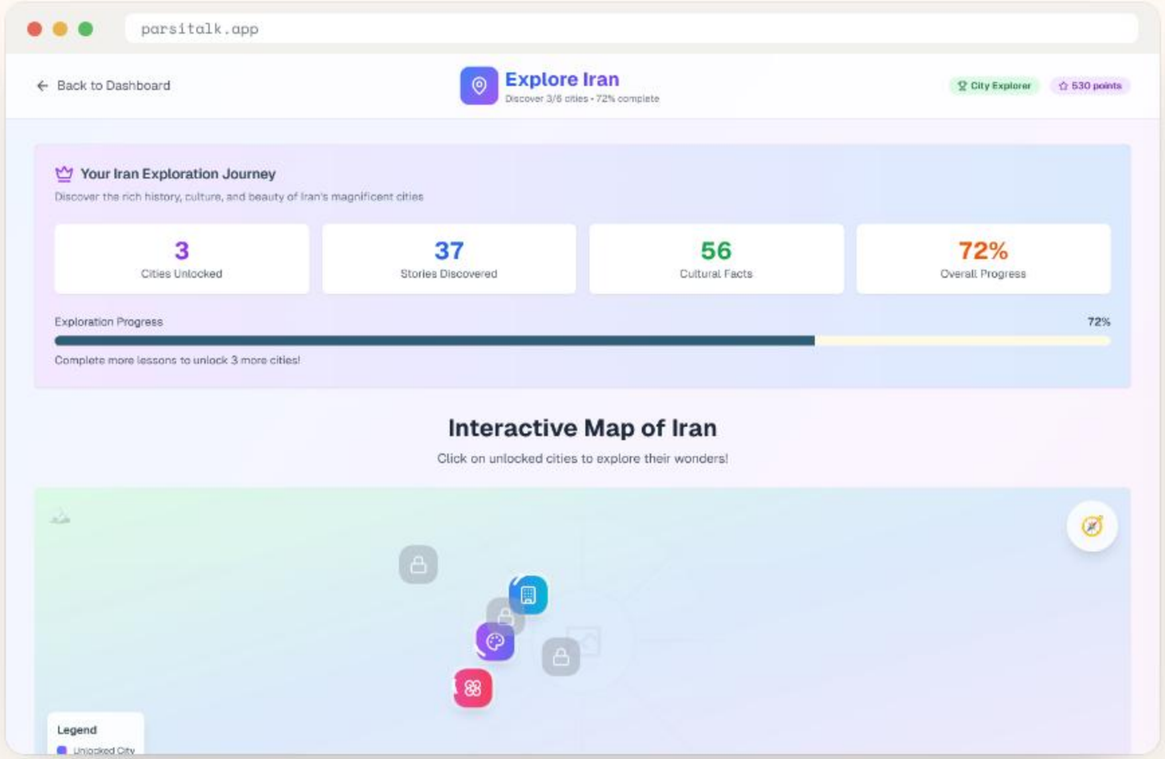

01 **Progression**
Letters → simple words → names → poetry lines → decorative art

02 **Guided strokes**
Order shown step by step, guide can be hidden

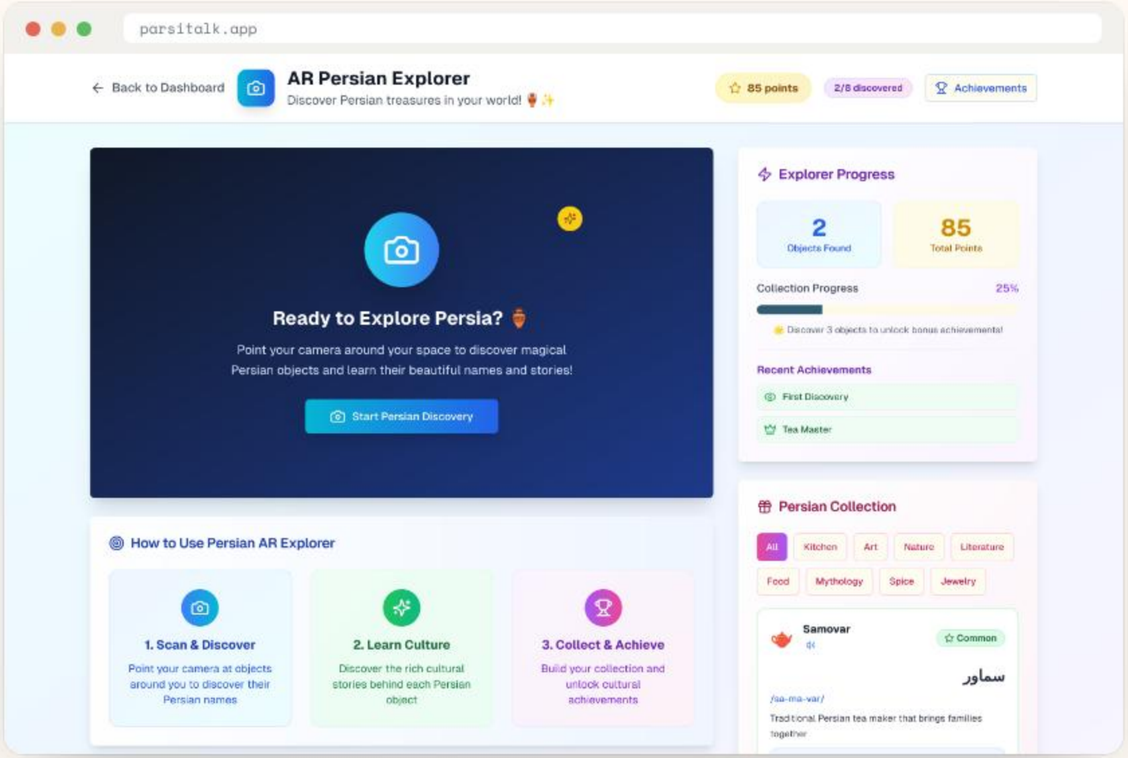

03 **Badges**
Master Calligrapher, Daily Writer, Poetry Artist

10 — EXPLORE IRAN & AR

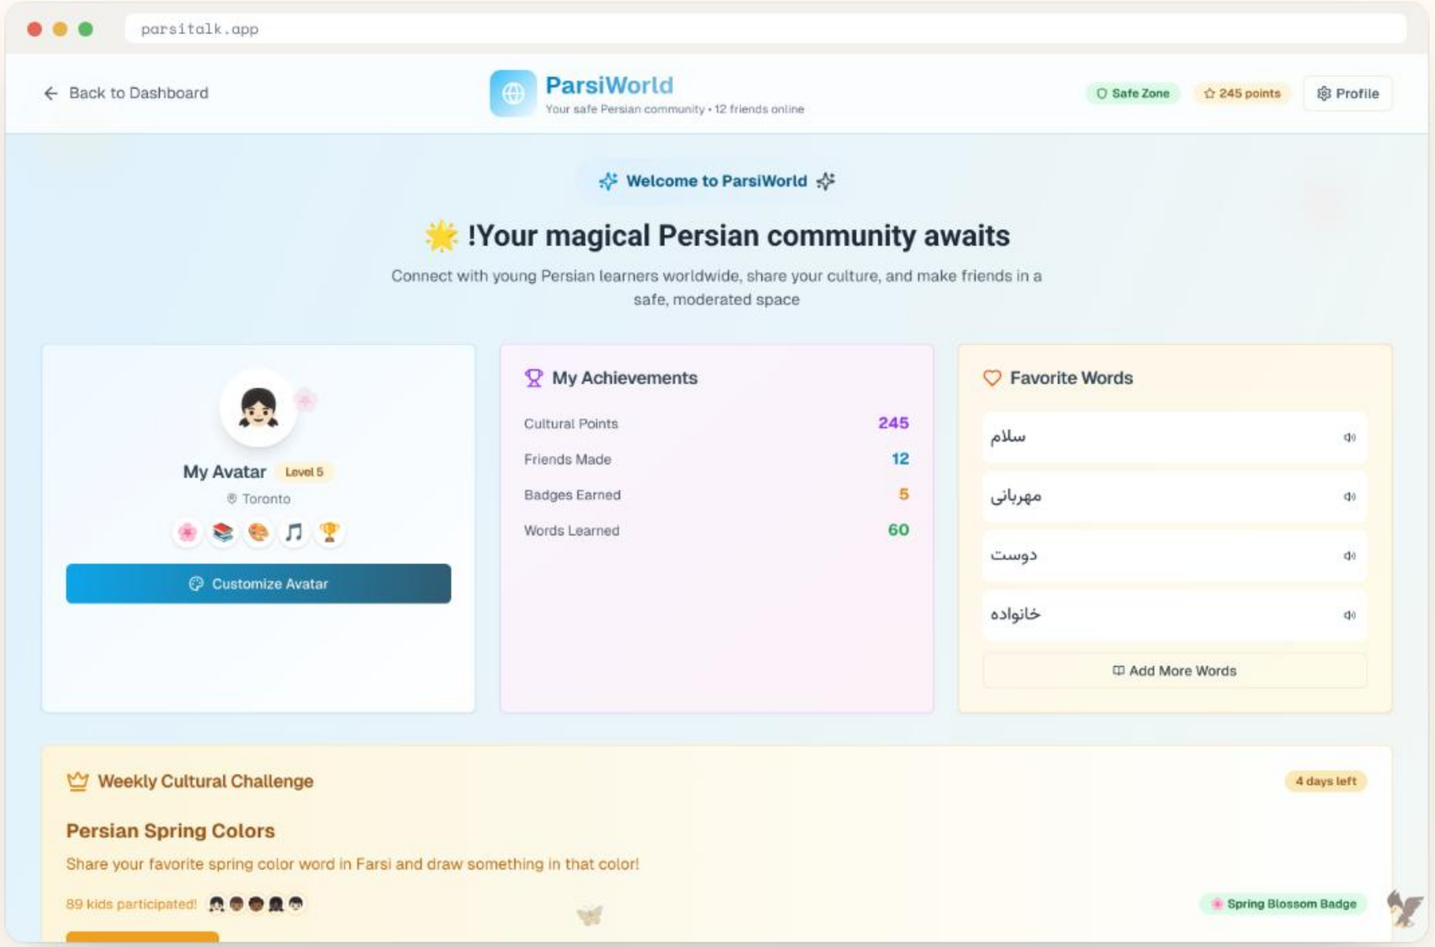

A country to unlock

An interactive map of Iran: finishing lessons unlocks cities — Tehran, Shiraz, Isfahan, then Yazd, Tabriz, Kashan — each with its own stories and cultural facts.

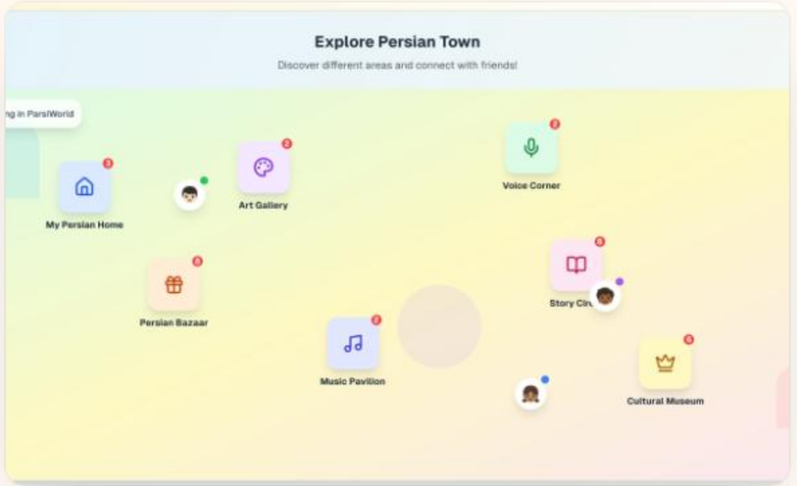

The AR Explorer turns the room into a lesson: point the camera at an object, learn its Persian name and the culture behind it, and collect it.

11 — PARSIWORLD

A safe place to belong

Learning a heritage language alone can feel lonely. ParsiWorld is a moderated community where young learners customise an avatar, collect favourite words and join weekly cultural challenges — like sharing a spring colour word in Farsi and drawing it.

12 — PARENT VIEW

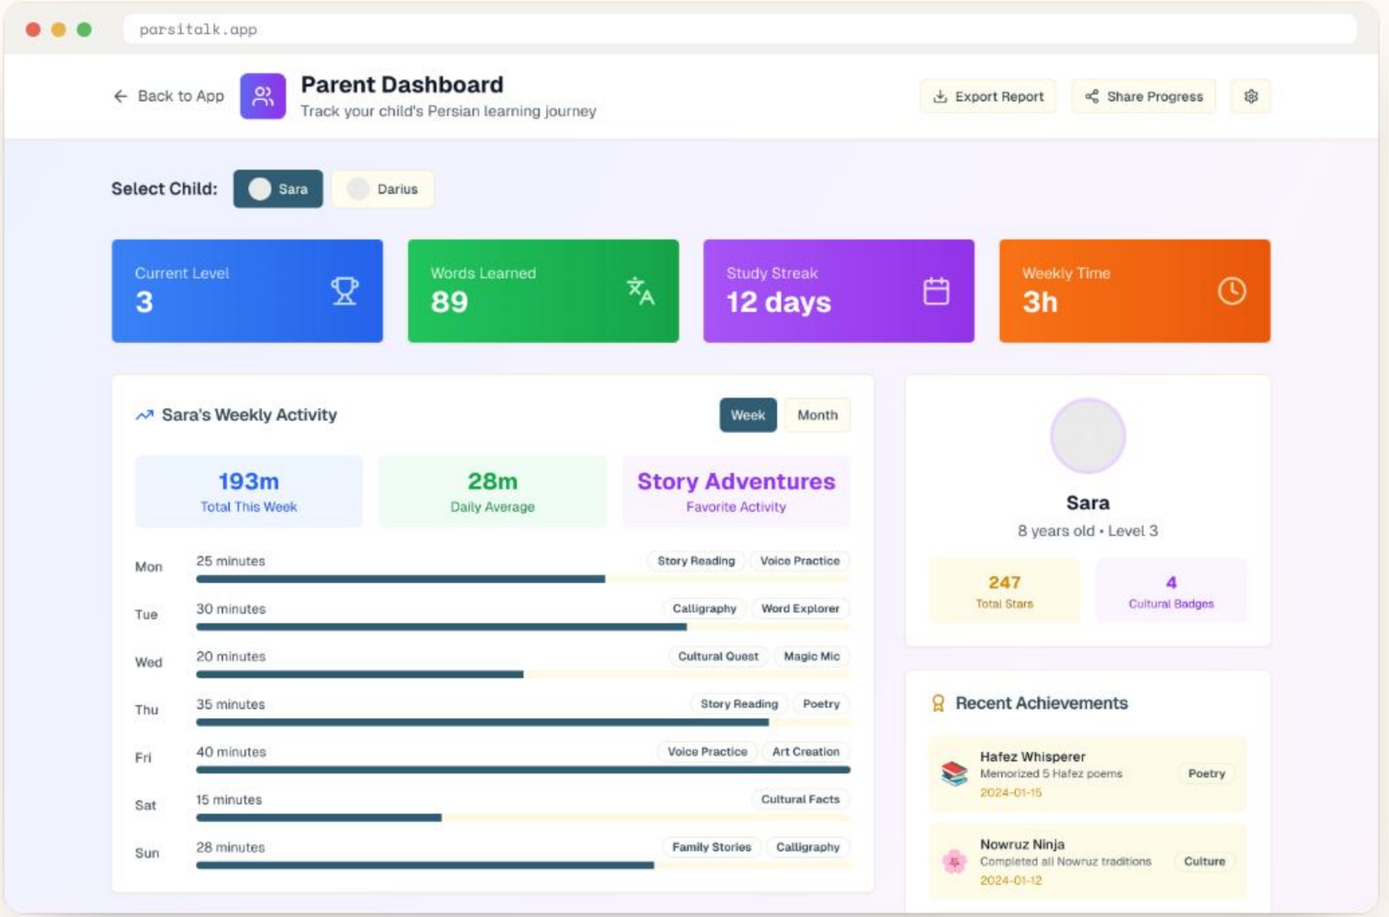

Parents in the loop

For young children, the parent is the real coach. The parent dashboard shows each child's level, words learned, streak and weekly time, which activities they love, strengths and suggestions per skill — and tools to send encouragement or set goals.

01 **Several children**
Switch between kids in one tap

02 **Insights**
Vocabulary, pronunciation, culture, writing

03 **Share**
Export a report or share progress with family

13 — DESIGN SYSTEM

Colours with Persian names

Safavid صفوی

The deep blue-green of Safavid tilework. Trust, depth, headings.

#305F72

Pomegranate انار

The fruit of Yalda night. Primary actions and energy.

#C44233

Jegari جگری

The warm Persian crimson. Highlights and the end of the gradient.

#F15060

Saffron زعفران

Iran's golden spice. Stories, rewards and streaks.

#F0A020

Ivory عاجی

A warm paper ground, softer than white.

#FFF9F2

TYPE

Geist Sans

سلام! به پارسی‌تاک خوش آمدید

A clean, neutral sans for interface text; Persian appears in its own script, always next to its English meaning.

SIGNATURE GRADIENT

Safavid → Pomegranate → Jegari. Used for the main headline and the big calls to action only.

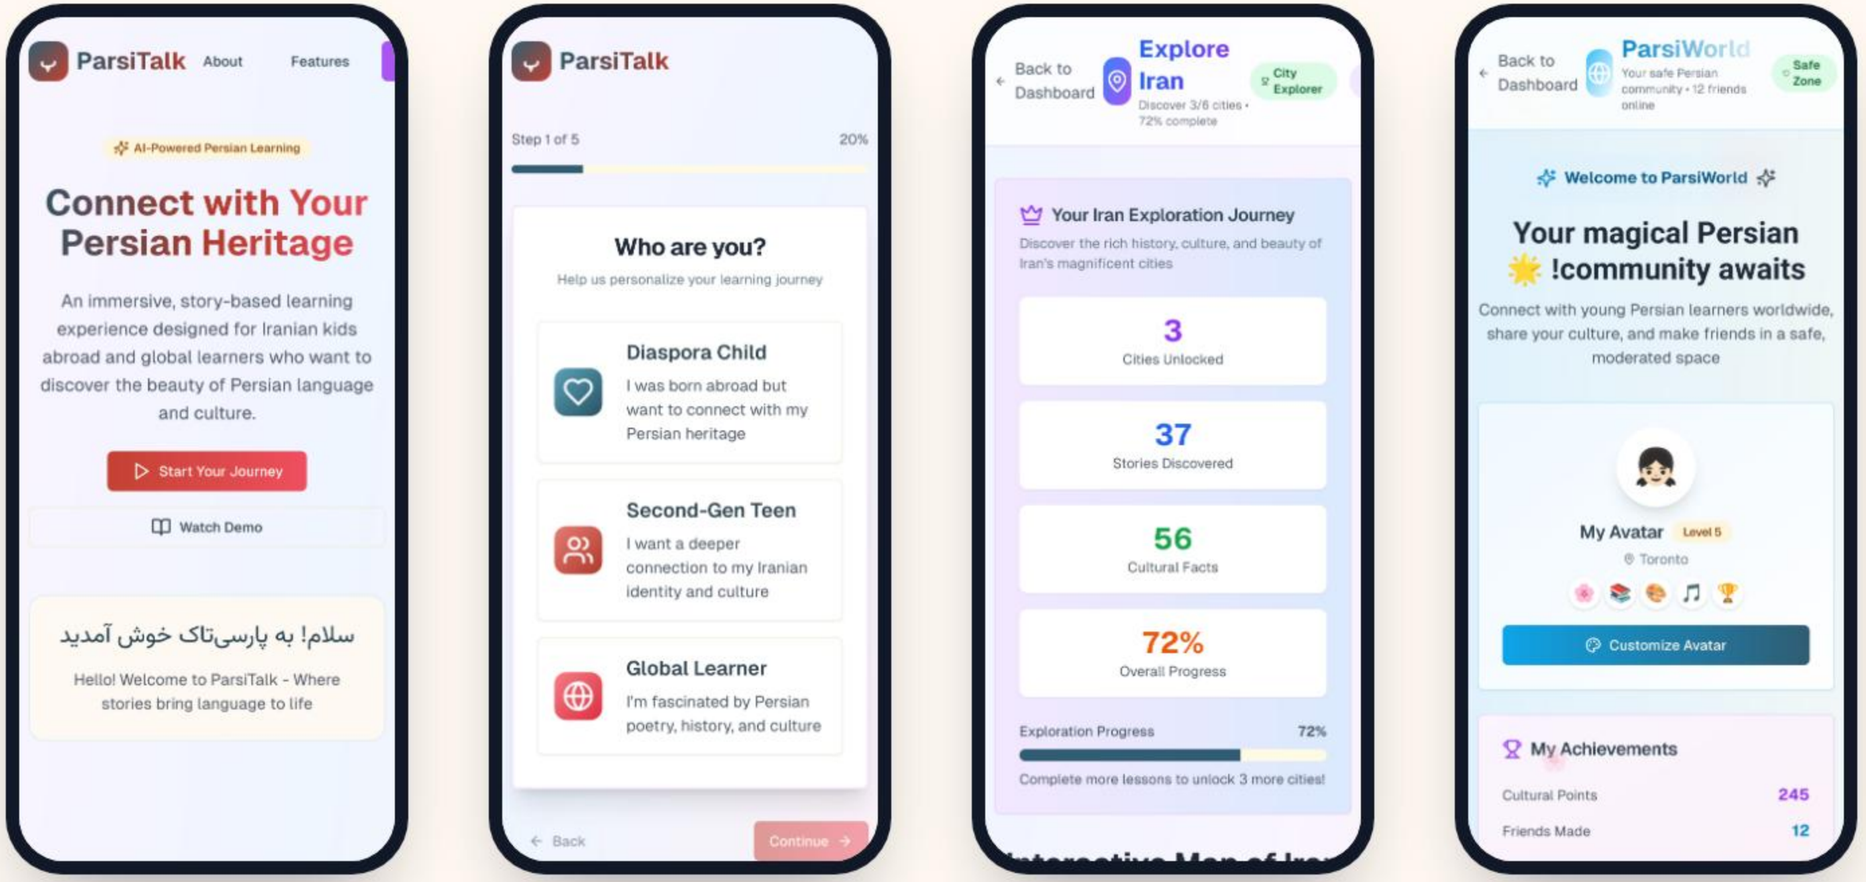

COMPONENTS

Beginner Intermediate Advanced

Level badges, progress bars, streak chips and soft rounded cards repeat on every screen.

14 — MOBILE

Made for small hands too

Every screen reflows to a single column on a phone: cards stack, Persian text keeps its size, and the main actions stay within thumb reach.

THANK YOU
