Game Overview

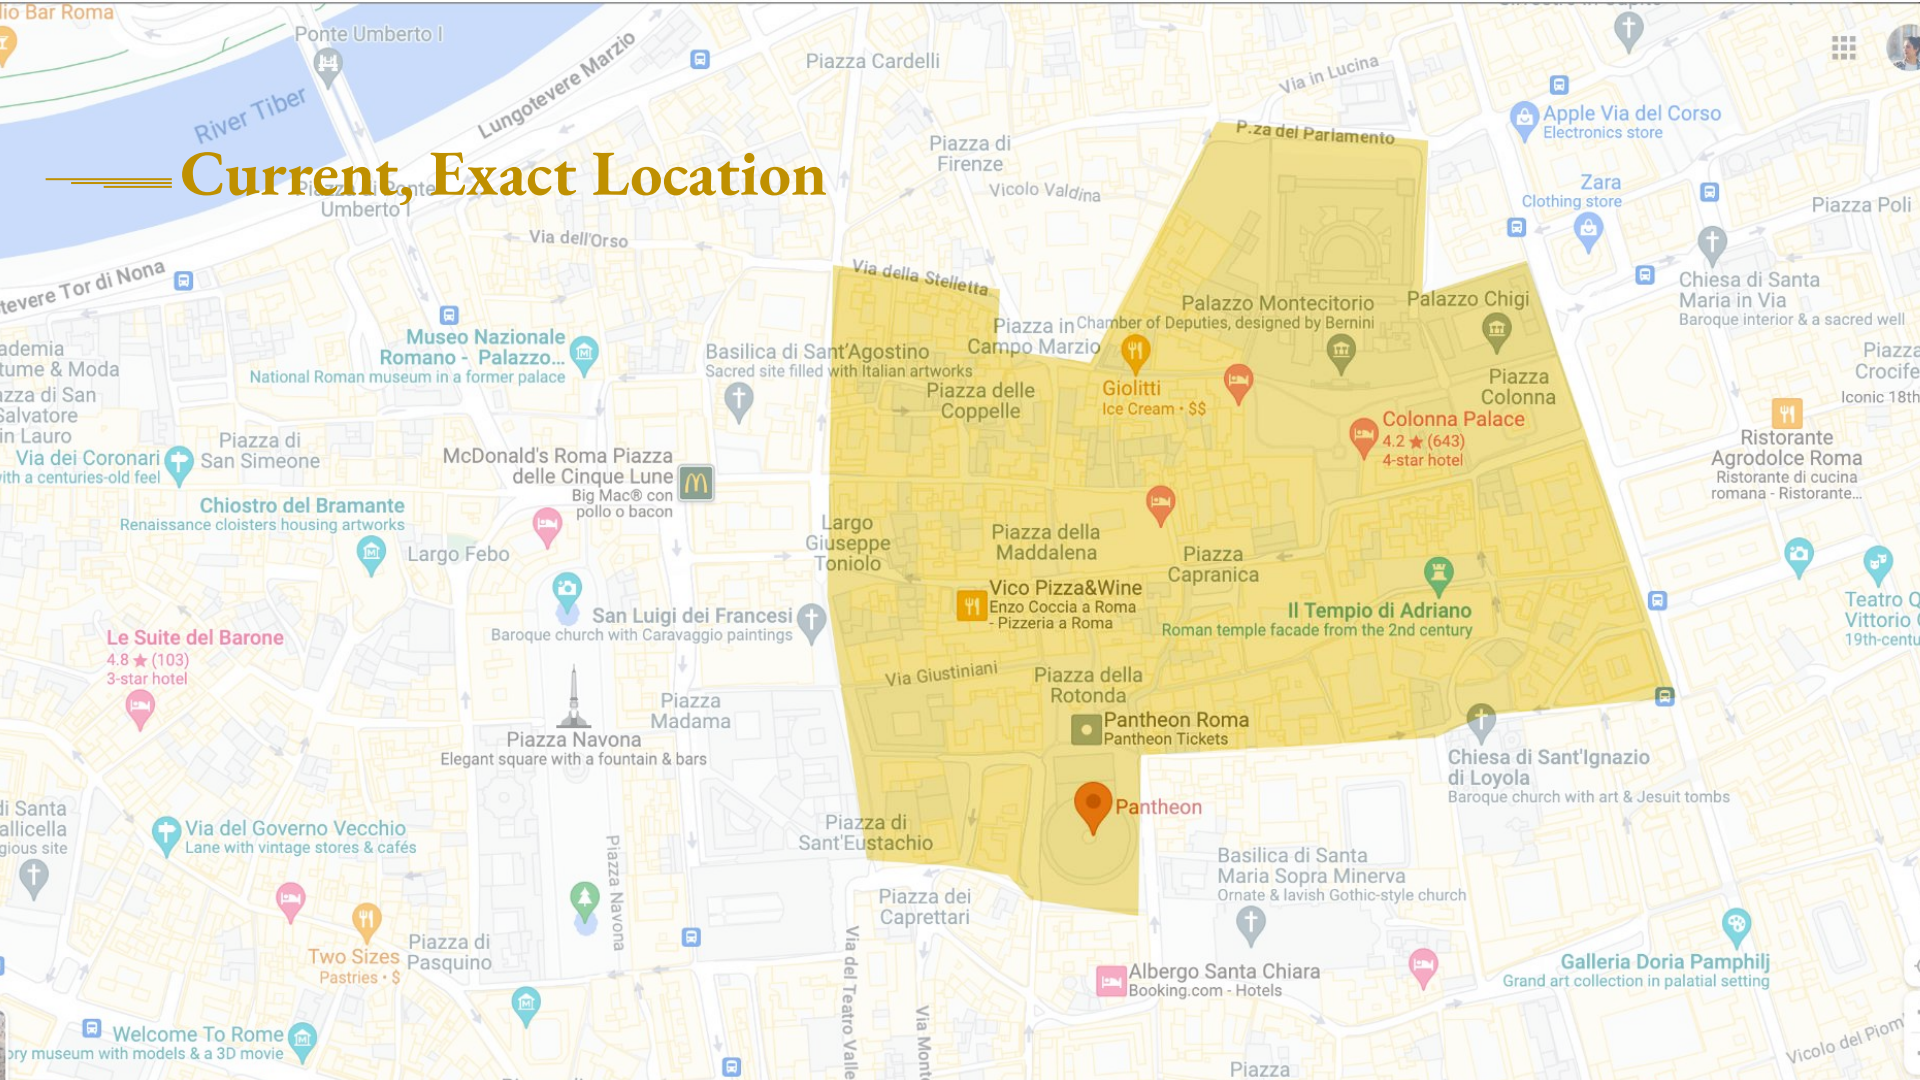

Games are diverse forms of entertainment with multiple objectives. They offer entertainment, education, and training, engaging players in various experiences. Game design allows for storytelling and fosters creativity, often incorporating competition and social interaction. Games provide a means of escapism, relaxation, and problem-solving, and they can deliver a sense of achievement and progression. The reasons for designing games are vast, catering to a wide range of player interests and needs.

Primary Building

Pantheon (Ancient)

In the aftermath of the Battle of Actium (31 BC), **Marcus Agrippa** started an impressive building program. The Pantheon was a part of the complex created by him on his own property in the Campus Martius in 29–19 BC, which included three buildings aligned from south to north: the Baths of Agrippa, the Basilica of Neptune, and the **Pantheon**.It seems likely that the **Pantheon and the Basilica of Neptune were Agrippa's sacra privata, not aedes publicae** (public temples).The former would help explain how the building could have so easily lost its original name and purpose (Ziolkowski contends that it was originally the Temple of Mars in Campo) in such a relatively short period of time.

1778 Piranesi Giovanni Battista Mogliano Veneto 1720 - Roma, 1778

1778 Piranesi Giovanni Battista Mogliano Veneto1720 - Roma, 1778

Pantheon is defined as a temple to all gods.

_ former **Roman temple**

_ since 609 AD, a **Catholic church** (Basilica Santa Maria ad Martyres or Basilica of St. Mary and the Martyrs)

_ commissioned by **Marcus Agrippa** during the reign of Augustus

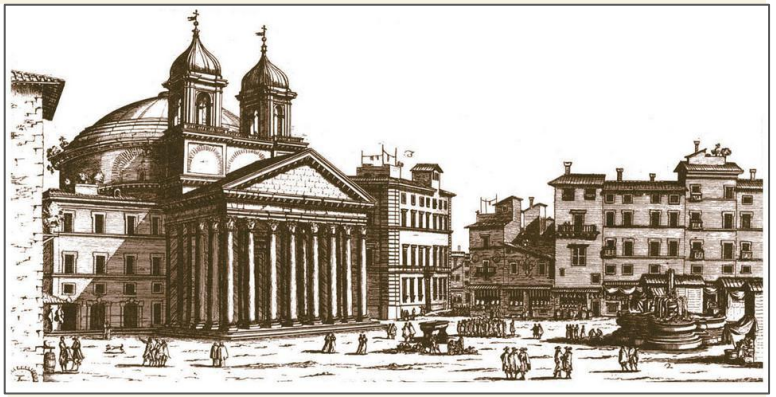

_ Its date of construction is uncertain, because Hadrian chose not to inscribe the new temple but rather to retain the inscription of **Agrippa's older temple.**

Pantheon (Pediments)

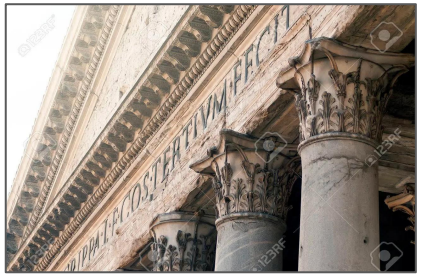

_Block 19 of the eastern pediment horizontal cornice was damaged and repaired in Roman times, but there is no evidence of restoration work on a statue.

Pantheon (Present)

_In use as a **Catholic church**
_**Masses** are celebrated there on Sundays and _Holy days of obligation.

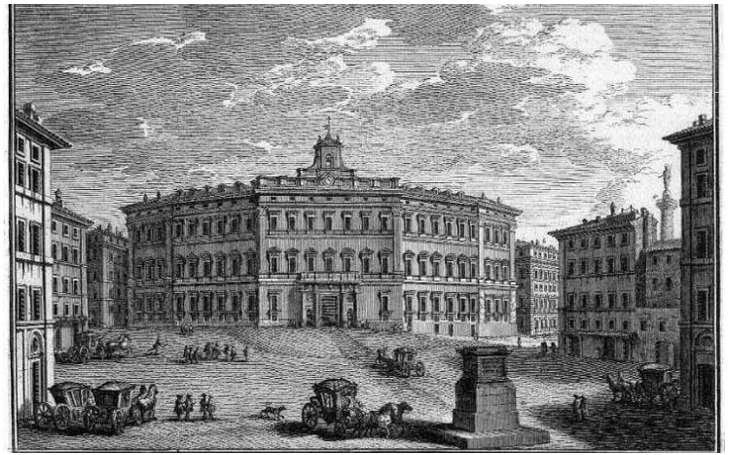

Other Primary Buildings

Palazzo-di-montecitorio

_The **seat of the Chamber of Deputies**, the lower house of the Italian Parliament
_Designed by **Gian Lorenzo Bernini** for the young Cardinal Ludovico Ludovisi, nephew of Pope Gregory XV

1752

Present

Other Primary Buildings

Chiesa di sant ignazio di loyola

_ **Roman Catholic** titular church, of deaconry
_ Dedicated to **Ignatius of Loyola**, the founder of the Society of Jesus
_Built in **Baroque style** between **1626 and 1650**

1987

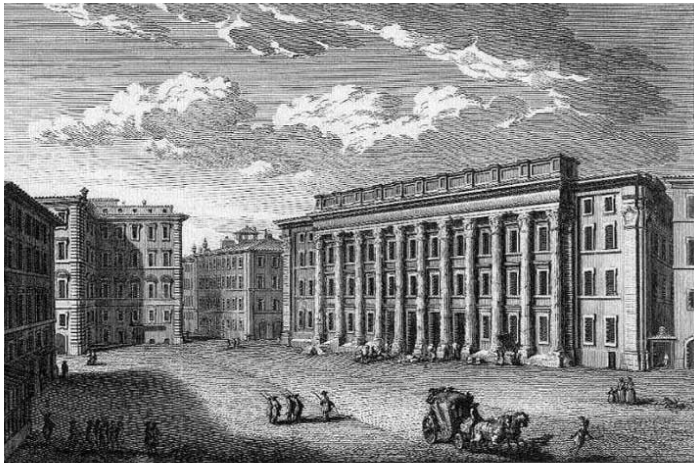

Present

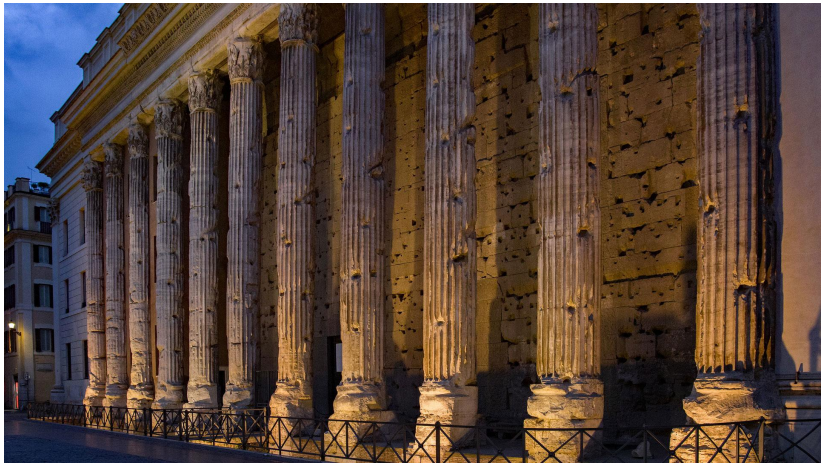

Other Primary Buildings

Piazza di Pietra

_An ancient Roman structure on the **Campus Martius** in Rome, Italy,
_Dedicated to the deified emperor **Hadrian** by his adoptive son and successor Antoninus
_This temple was previously known as the **Basilica of Neptune**

1752

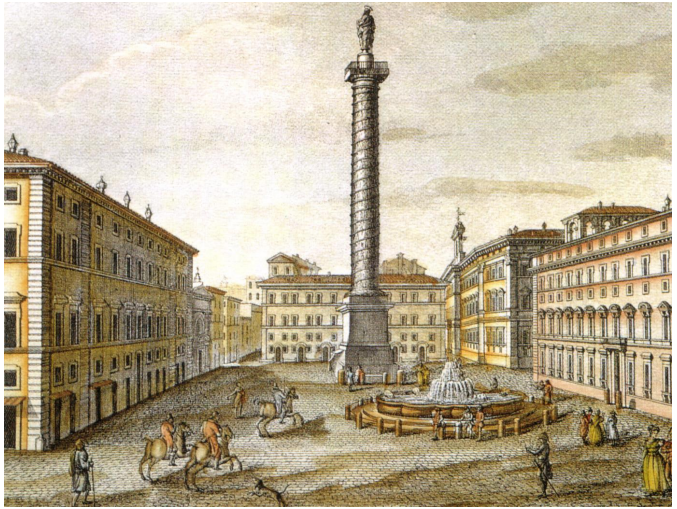

Present

Other Primary Buildings

Piazza Colonna Roma

_**P**iazza at the center of the Rione of Colonna in the historic heart of Rome, Italy
_Named for the **marble Column of Marcus Aurelius,** which has stood there since AD 193
_The bronze statue of Saint Paul that crowns the column was placed in 1589, by order of Pope Sixtus V
_The Roman Via Lata (now the **Via del Corso**) runs through the piazza's eastern end, from south to north.

Game Characteristics Study

Game Objectives

The specific goals or targets that players must achieve in a video game to progress, win, or complete a particular level or mission.

CHRONOLENS is a graphic adventure game, Designed for Microsoft Windows.

GENRE

Action-adventure, Casual game, Adventure

MISSION

The defined and desired mission of the game is **to make players acquire more detailed knowledge about Rome in 18th century** and the importance of its history and specially Pantheon through an adventurous and engaging game

PLAYER'S FEELINGS

Thanks to the gameplay, the players will share the typical **curious and empathic feeling** of a student or only a history passionate, becoming more aware about Rome's historical heritage and its less-known historical curiosities.

GAMEPLAY'S OVERVIEW

Structured on a linear design level, the game will have **different tasks** which the player will have to complete in order to succeed and return back to their time. In order to accomplish their missions, the exploration and importance of Pantheon is important.

Target Audience

The group of individuals or viewers for whom a particular piece of content, performance, or message is intended or designed to reach and engage.

TARGET_Customers

We specialize in working with respected **institutions and museums** that want to make the history of Rome more engaging. Our clients include top American universities and well-known museums in Rome. We aim to create experiences that deepen people's understanding and enjoyment of history.

TARGET_Players

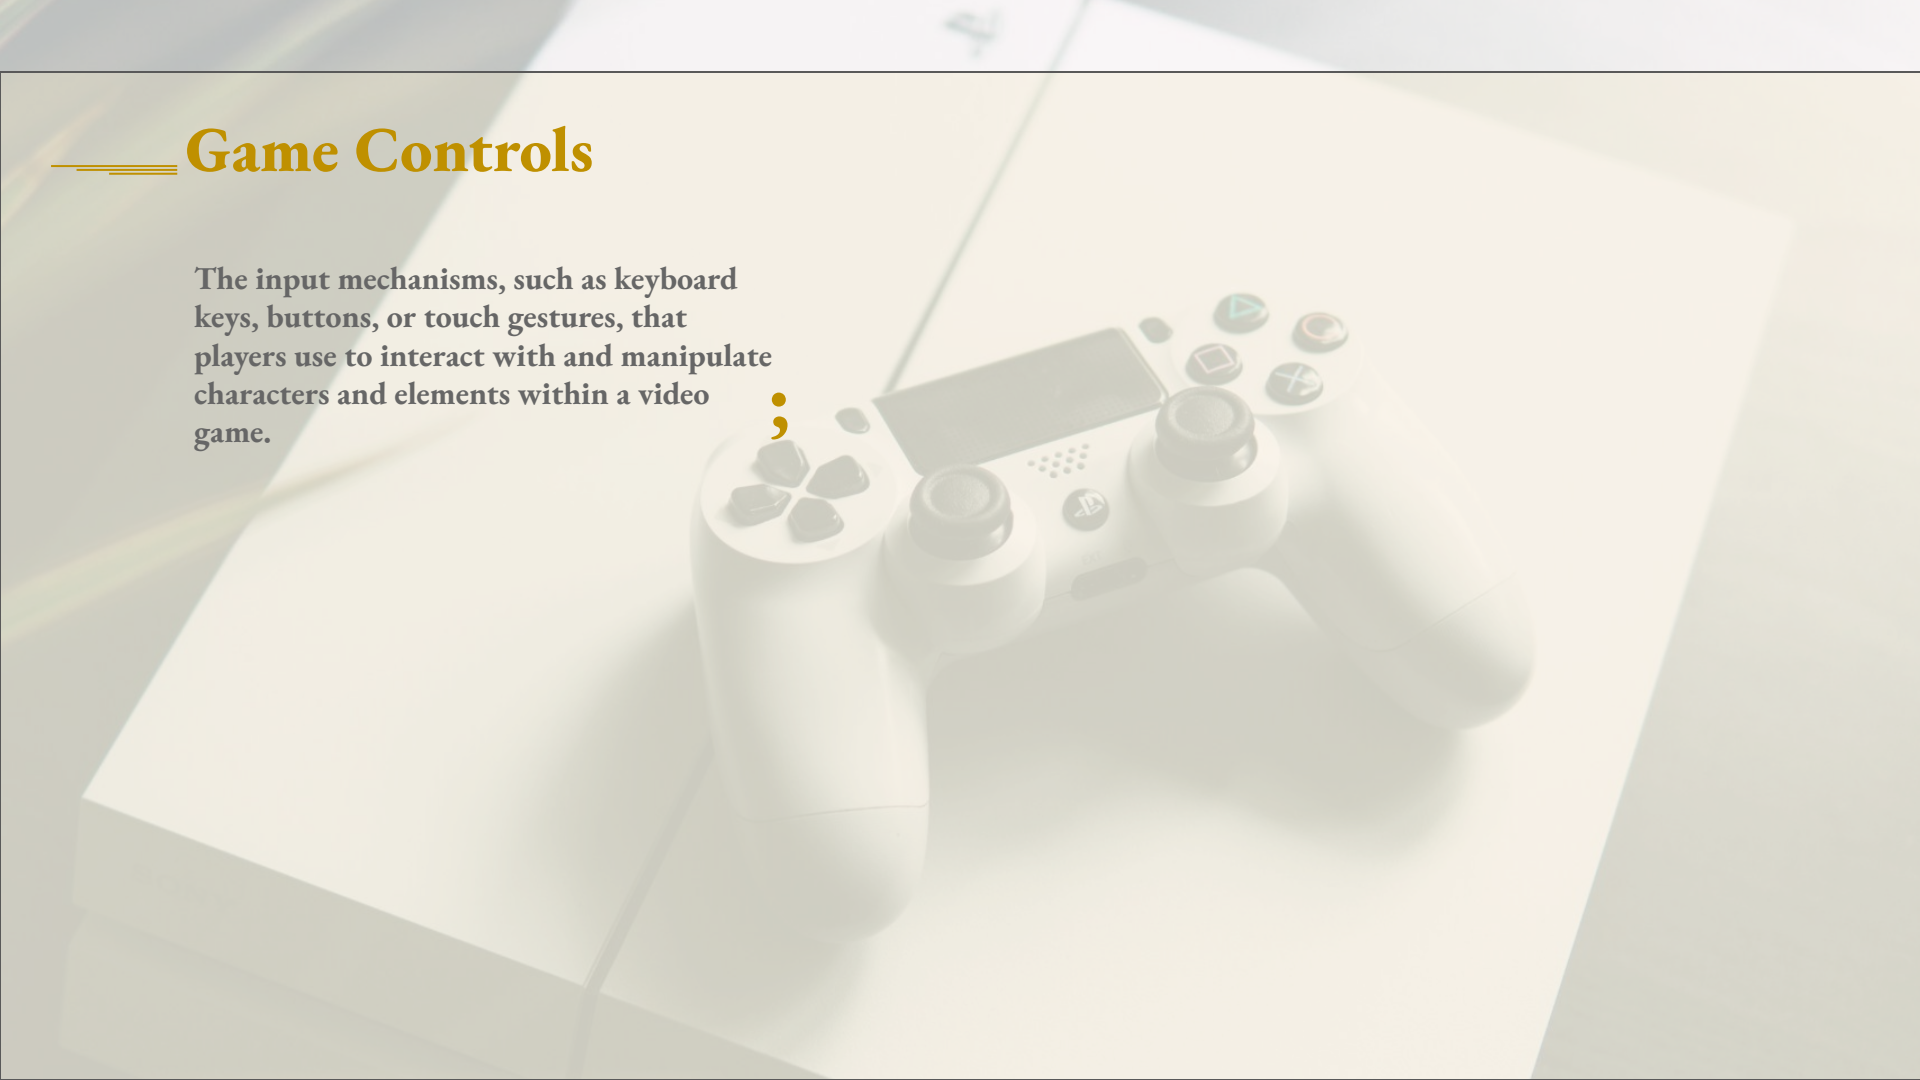

Our players, the protagonists of this immersive journey, comprise s**tudents at various academic stages, ranging from the second grade of middle school to high-school and university scholars**. Additionally, those who enjoy narrative-driven games with elements of exploration, puzzle-solving, and suspense. The game would likely appeal to players who appreciate immersive **storytelling and atmospheric environments.**

PRICE TAG

The game will be priced around 15-20 euros, with a special offer for students at 10-15 euros, ensuring it's accessible to a wide range of players.

Game Controls

The input mechanisms, such as keyboard keys, buttons, or touch gestures, that players use to interact with and manipulate characters and elements within a video game.

LEVEL DESIGN

The levels are structured around Nerezza's (the main character) journey through time and the enigmatic cityscape of ancient Rome. Players navigate a series of distinct environments, from the dimly lit antique shop where the adventure begins to the transformed, snow-covered ruins of Rome, with a towering Pantheon at its center and always start point of the game.

GAME'S PLATFORM AND CONTROLS

Designed for a PC platform (Windows system), the controls will follow the standard PC control scheme:

- **WASD** buttons for the movement of the character
- The **spacebar** to jump
- left mouse button for taking pictures – the mouse's movement for visuality
- The "**C**" key to **Collect**
- The "**T**" key to **Talk**
- The "**F**" key to **Open the chest**
- The "**E**" key to **Shoot**

Accessibility

The design and implementation of features and options that make video games more inclusive and usable for players with disabilities, ensuring they can enjoy and participate in gaming experiences.

HEARING IMPAIRMENT

For the people with Audible problems there will be subtitles to the dialogues and captions for sound effects (*Sobbing* / *screaming* / *chest opening *).

Audio / sound design

The distinctive attributes and qualities that define a specific video game, encompassing its gameplay, visual style, genre, and other key features that set it apart from other games.

SOUND EFFECTS

- **Camera's Shutter** while taking pictures
- **Chest opening** sound
- **Collecting Stones and pine fruits** sound
- **Shooting stones** sound

BACKGROUND AMBIENT

Cold Wind Blowing
Wind hitting windows

BACKGROUND MUSIC

Our game opts not to include background music to maintain focus on delivering educational content, ensuring players can fully absorb the material and concentrate on the tasks at hand. Additionally, in line with our commitment to realism, especially in simulations of real-world scenarios or professional training, background music is omitted to preserve the authenticity of the experience, mirroring actual workplace environments where such music may not be present.

DIALOGUE

We utilize a **voice generator for each character's voices and dialogues.**

Game Environment

the virtual or digital setting and surroundings within a video game where the gameplay and story unfold, including the world, terrain, objects, and atmospheric elements.

KEY LOCATIONS

Pantheon is the main location in which the main character have to walk and discover what is happening around her, during the game NEREZZA also will go through some main buildings like **Palazzo-di-montecitorio, Chiesa di sant ignazio di loyola, Piazza di Pietra and Piazza Colonna Roma and the fontana.**

PHYSICAL OBJECTS

Camera polaroid, Historical paper pieces, Stones, Pine fruits, chest, Tables, old plates, Painting frames, Trash Bins, Flasks, ...

WEATHER and TEMPERATURE

First scene of the game is placed in a **hot summer day, 25th of June**
And then Nerezza Wakes up in a **cold, cloudy weather while it is snowing**

PHYSICS

The physics of the game will be **realistic with real dimensions**

Technical details

The distinctive attributes and qualities that define a specific video game, encompassing its gameplay, visual style, genre, and other key features that set it apart from other games.

Softwares:

- Rhino
- Unreal Engine 4.27 and 5.2
- Adobe Photoshop
- Adobe Illustrator
-Adobe Premier
-Adobe Aftereffects

OS: 64-bit Windows 7 or 64-bit Windows 8 (8.1)

Processor: Intel CPU Core i5-2500K 3.3GHz, AMD CPU Phenom II X4 940
Graphics: Nvidia GPU GeForce GTX 660 or AMD GPU Radeon HD 7870

Character

virtual persona, entity, or avatar within a video game that can be controlled or interacted with by the player, often playing a central role in the game's narrative or gameplay.

MAIN CHARACTER: NEREZZA

PRESENTATION

Female History student of 23 years old.
The name chosen is not random, It's an italian girl name means "**Darkness**".
A proper name for both the time-traveller protagonist and the future player.

FEATURES

- Growth oriented and strong, visionary, adventurous, spendthrift, freedom loving, restless, spiritual, Adventurous, Energetic, Curious, Visionary, Magnetic, Expansive.
- Clever and ironic, she's filled with the typical Roman Humour to downplay even the most dramatic situations, allowing her to analyse the situations from an objective point of view to resolve eventual issues.

DIALOGUES

Within the intricate tapestry of dialogues and exchanges with other characters, she shall be bound to offer mere conventional responses. However, the nuances of her persona will unfurl through the enchanted portals of triggered user interfaces, where her distinct observations and viewpoints will cast a revealing light on her essence.

Gamification

Story

Input mechanisms, such as keyboard keys, buttons, or touch gestures, that players use to interact with and manipulate characters and elements within a video game.

Story Overview:

On a hot summer day Nerezza, a curious young woman, roams through the crowded old Bazaar. Her attention is caught by peculiar picture frames on the walls, leading her to an antique shop. Inside, she brushes against an old camera, startling a terrifying old man who shouts at her. Fleeing in panic, she realizes she's inadvertently taken the camera with her. Curiosity getting the better of her, she snaps a photo from one of the frames.

as she takes a photo, she noticed something was different. there are drops of blood on the frame. and everything fades to black.

As she wakes up. The world around her seems distorted and unfamiliar. The once-familiar sights of the city now appear strange and disjointed. Pantheon's facade is different, and Nerezza herself feels changed as if something foreign has taken hold within her.

Lost but determined, Nerezza meets a young girl who needs help remembering her name. In return for assistance, the girl guides Nerezza in finding the ceremony and the people of the city. Instead of real humans, she finds mannequins above the grave. she goes back to the girl. The girl explains it's a tradition – when someone is killed, a mannequin stands in their place. Nerezza realizes a photographer has been killed. When she asks who did it, the girl says, "Nobody knows."The young girl helps Nerezza to solve the city's mysteries.

With the girl's help, Nerezza sets out to uncover the city's mysteries. Along the way, she meets different people who have clues about a hidden murderer. But the real breakthrough comes when they find hidden picture frames scattered across Rome. Each frame holds a piece of a photo that reveals the truth about the photographer's death. With determination, Nerezza collects the pieces and exposes the murderer's identity. Justice is served, and the city's secrets are revealed.

The climax of the story happens when Nerezza confronts the murderer – a priest serving in the Pantheon. She accuses him of the crime, showing him the evidence she's gathered. Angry, the priest tries to destroy the photos and attack Nerezza, but she manages to escape. In the chaos, the priest meets his end in a fire within the Pantheon.

As Nerezza leaves the building, she feels dizzy and collapses once more. When she wakes up, she finds herself back in the heat of that summer day. The camera is gone, and the frames are now filled with bougainvillea flowers. As the sun sets, Nerezza stands in the quiet streets, the camera capturing the end of a forgotten story. And with the city now at peace, the spirit of the photographer can finally rest, his legacy preserved.

1: Starting Point: [Press WASD to move]
Also use mouse to navigate around; Go towards the obstacle.

2: When goes near the Obstacle : [Press Space to jump]
Then jump and pass it.

3. Just after the Obstacle we will see the little girl. As we get closer: [Press T to talk]
As the dialogue begins (Dialouges.pdf) , the camera goes around the characters. (+Talking gesture for the little girl)

4: Continue the same path to rich the crazy man.

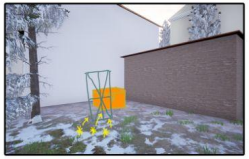

5: We Will See The crazy man standing inFront of the chest. As we get closer to the man, He shout "Get away" (Dialouges.pdf)

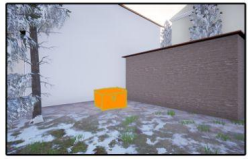

6. Continue the path to see Stones on the ground.

7: As we get closer: [Press C to colect]; Return the same path to the grazy man.

8: Get close to the Crazy man: [Press E to shoot]
many stones shoot towards the man.

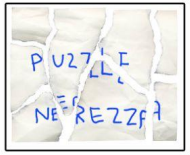

9: The man Goes off the screen.

10: Get close to the chest: [Press F to open]
She will colect shattered papar.

11: open The Inventory and Click on the Collected papers.

12: with a transition pieces go together and name of the little girl is readiable.

13: Go back to Girl, press T Dialouges.pdf)

14: Continue the path base on the Reference path. Colect Pines until the mannequins are visible. go and stand between them.

1: Logo On the sky; Fade Away, Look at the path

2: Go until reach the first frame, lok at the frame, then continue.

3: Many frames in the path; Increase the speed of walking to follow the other one.

4: Next Frame

5:Next Frame

06: Continue to Next Frames.

07: Flerai Frame. Notice the frame, The difference of ground texture and bench.

08: Notice The building. Go towards it.

09: Enter the wall; Fade away.

10: She the camera she collects.

11: Angry Old man shout at her.

12: Turn out of the Antique shop.

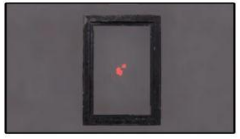

13: Look again at antique shop; Then look down at her hands.

14: Look towards the Frame and start taking Photos

15: Take photos of the frame.

16: Zoom in; Drops of bloods appear. Zoom in and fade away.

17: Black Screen.

18: From Tutorial Infront of Pantheon; Looking around.

3D Modelling

Rendering

Rendering for 3D models is the transformation of digital 3D scenes into 2D images. It involves geometry processing, shading, lighting, and camera simulation to create a realistic visual representation. This process is essential in applications like video games, architectural visualization, and film production. It includes steps like rasterization and post-processing to enhance image quality. Overall, rendering for 3D models bridges the gap between digital models and the images we see on screens or in print.
