Posters

Five briefs, five ways of making type and image carry an event.

Exhibitions, a biennale, a leadership forum and a typography competition — each poster built around one idea and one material: extruded letters, neon, marbled ink, balanced shapes and warped lines.

02 — BEFORE YOU BEGIN

One idea per poster

Each board shows one poster: the work in place first, the flat artwork beside it, then the idea, the type and the palette. The last three boards treat the Dubai Mall series as a system — one layout, three artists, three colours.

Mockups place each poster where it would be seen: a billboard, a street panel, a wall, a frame in a room.

03 — EVENT POSTER

MEF Leadership Forum

A poster for the MEF Leadership Forum in Rome on 9 May 2023, at Lungotevere dei 26, The First Musica. The letters “mef” are extruded into deep, fading three-dimensional forms that sweep across a flat blue field, with the event details set small in a technical display face.

THE IDEA

The name moves forward: three letters pulled into long shadows, as if they were travelling across the poster.

EVENT	MEF Leadership Forum
PLACE	Rome · The First Musica
DATE	9 May 2023
FORMATS	Billboard · street panel

04 — EXHIBITION POSTER

No, Neon No Cry

A poster for “No, Neon No Cry” at MAMbo, Project Room, from 12 May to 23 October 2022. The title is written as glowing neon script on a deep red ground, with the venue and dates in the same neon hand below.

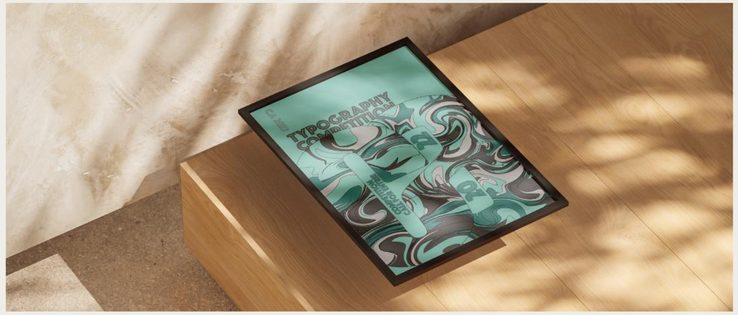

THE IDEA

Neon without the tube: the title is drawn as a single glowing line, so the poster feels lit from inside.

EXHIBITION	No, Neon No Cry
VENUE	MAMbo · Project Room
DATES	12 May – 23 October 2022
LETTERING	Hand-drawn neon script

05 — CALL FOR ENTRIES

Typography Competition

A call-for-entries poster for a typography competition in 2022. The title sits above a marbled swirl of teal, grey and charcoal, cut through by rounded vertical bars that carry the call for entries and the year, set at a right angle to the reader.

THE IDEA

Type you have to turn your head to read: the information runs up the bars, so the poster asks for the same attention a typographer gives letters.

BRIEF	Competition · call for entries
YEAR	2022
TEXTURE	Digital marbling
LAYOUT	Rotated text on rounded bars

06 — BIENNALE POSTER

Media Architecture Biennale

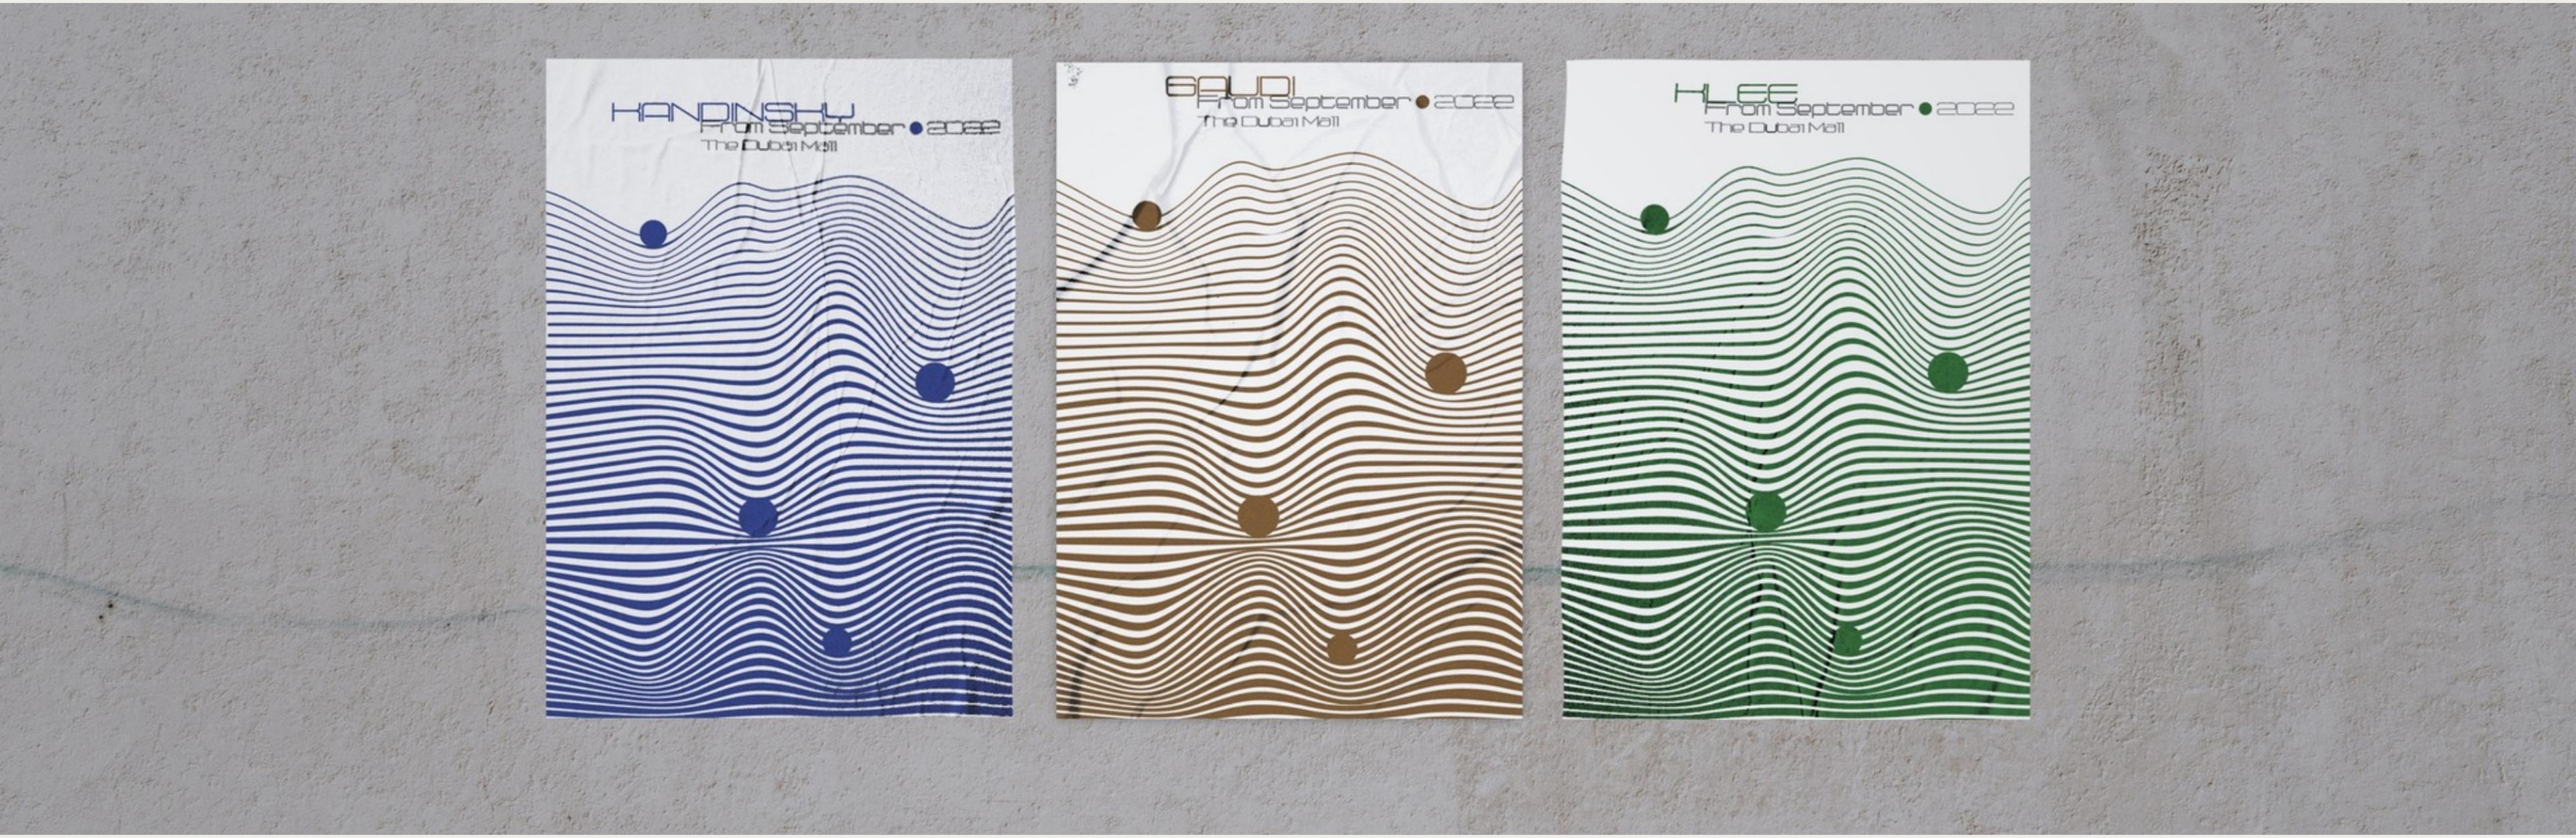

A poster for the Media Architecture Biennale, from 28 June to 2 July 2021. Simple geometric shapes, a circle, two half-circles and three arches, balance on top of one another in navy, violet and olive on a speckled off-white ground, beside the event title in a stencil display face.

THE IDEA

Architecture as a balancing act: six basic shapes stacked into a figure that could be a building, a person or a sculpture.

EVENT	Media Architecture Biennale · MAB
DATES	28 June – 2 July 2021
SHAPES	Circle · two half-circles · three arches
FORMATS	Wall poster · billboard

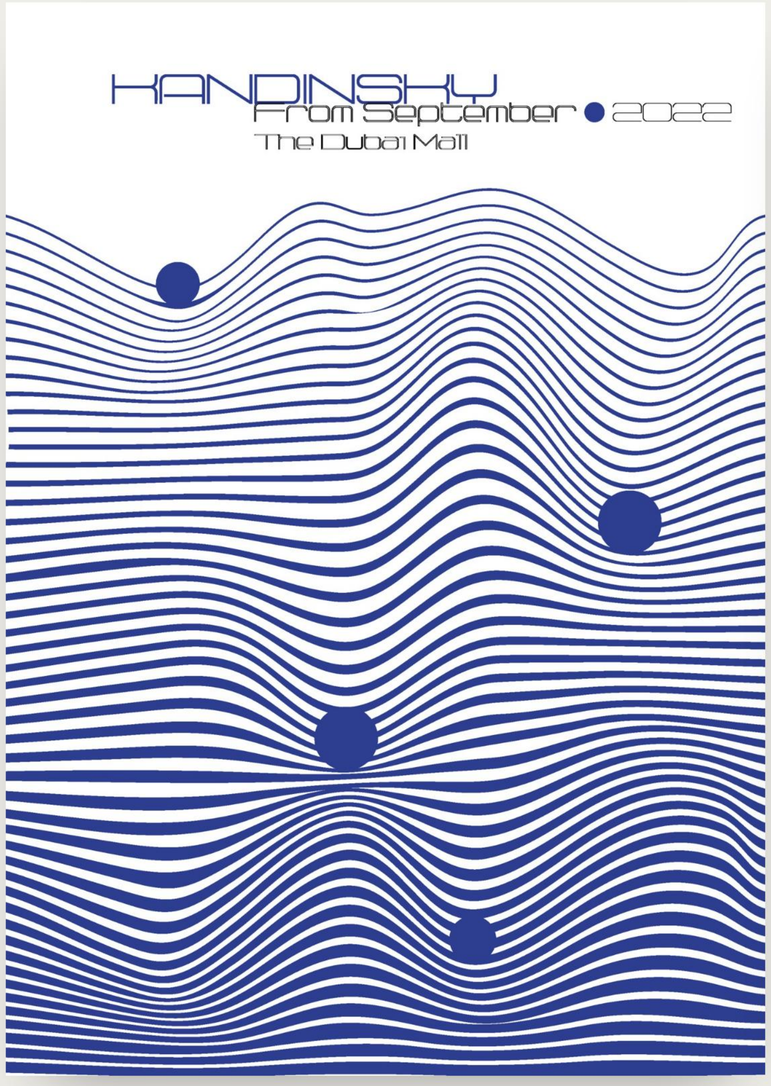

07 — EXHIBITION SERIES · THE DUBAI MALL

One system, three artists

A series of three exhibition posters for The Dubai Mall, from September 2022. They share one system: bands of lines that warp around solid circles, as if the dots were weighing down the surface. Only the colour changes for each artist, blue for Kandinsky, ochre for Gaudí and green for Klee.

Kandinsky #2C3A89

Gaudí #7C5A27

Klee #2C7431

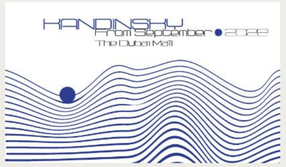

09 — HOW THE SYSTEM WORKS

Lines with weight

Each poster is the same drawing: horizontal bands that start thin at the top and thicken towards the bottom, then bend around four solid circles of different sizes. The circles read as weights pressing into a soft surface — movement and gravity drawn with nothing but line.

CONSTANT	Layout, lines, four circles, title block
VARIABLE	Artist name and one colour
TYPE	A thin, wide outline face — title in colour, date and venue in black
DETAIL	The bullet between “September” and “2022” is a small copy of the circles

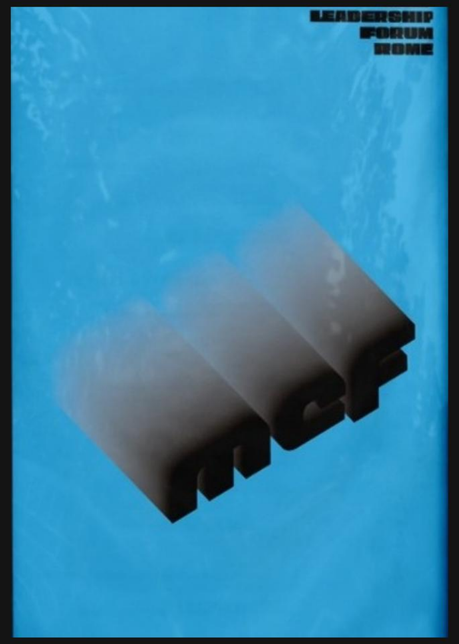

10 — FIVE IDEAS

Type that does more than inform

In every poster the title is also the image — extruded, lit, marbled, balanced or bent — so the event is recognisable before a single word is read.
