

PARS FOAM CUT

پارس فوم کات

A bilingual visual identity — Persian and English — built from one square module: a logo, a colour palette, two typefaces, a family of illustrations and the stationery that carries them.

DESIGN

Setayesh Ganji

SCOPE

GUIDELINES

Brand book, May 2023

02 — BEFORE YOU BEGIN

WHAT THIS FILE SHOWS

This file walks through the Pars Foam Cut identity the way it was built: first the rules — one module, four colours, two typefaces — then what grew from them: a bilingual logo, a family of illustrations and the printed pieces.

Each board stands on its own. Read them in order for the full story, or jump to the part you need.

CONTENTS

		BOARD
LOGO	How the mark is built from a single square module	03
COLOUR	Four colours, their values and the pairings that read well	04
TYPOGRAPHY	Chicago Flat for Latin, Far Beirut for Persian	05
CONCEPT	Two letters, two scripts — and where the mark may appear	06
ILLUSTRATION	The family's rules, then three drawings taken apart step by step	07–10
IN USE	Stationery, print and social icons	11

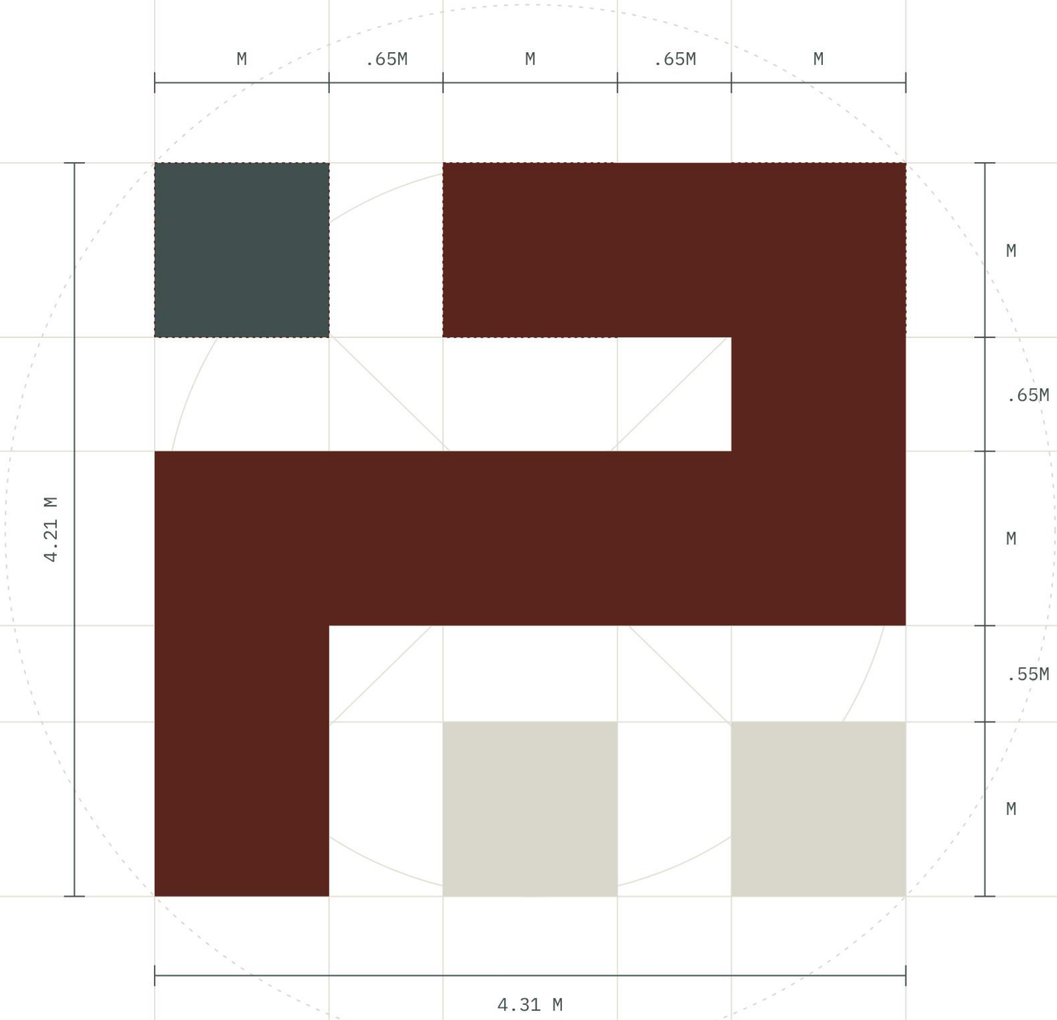

HOW TO READ

The boards share three conventions.

------ Thin and dashed lines are construction — the geometry under the finished drawing.

m Logo measurements are in M, the one square module, so they hold at any size.

01→04 Numbered steps follow the order each illustration was drawn. Persian headings come from the original brand book.

03 — LOGO

معماری نشان

LOGO CONSTRUCTION

The mark is drawn from one square module, M. Nine modules sit on a 3 × 3 grid and every cell is used: six oxblood squares join into the monogram, one graphite square floats above it and two foam-stone squares rest below. Strokes are exactly 1M; counters open at 0.65M.

BASE MODULE	M
STROKE WIDTH	1 M
COUNTERS	0.65 M
BASELINE GAP	0.55 M
OVERALL	4.31 M × 4.21 M
GRID	3 × 3 modules

04 — COLOUR

کد رنگها

COLOUR PALETTE

Four colours from the workshop floor: oxblood for the mark and headlines, graphite for text, raw foam for supporting shapes, and paper white — the only ground the logo sits on.

THE PAIRING

Both faces are heavy, low-contrast and built from flat geometric strokes, so Latin and Persian carry the same weight when they share a line.

PARS FOAM CUT

پارس فوم کات

06 — CONCEPT اجزا نشان

TWO LETTERS TWO SCRIPTS

Read in Latin, the mark spells F and P — Foam and Pars. Read in Persian it spells ف and پ, the first letters of فوم and پارس. The loose squares do double duty as the dots of the Persian letters: one above for ف, three below for پ.

P PARS

ف فوم

پ پارس

THE MARK

GROUND RULE

The mark lives on white only. On colour, photography or texture its three tones collapse into the background.

07 — ILLUSTRATION

ONE FAMILY OF DRAWINGS

Every drawing — from a single icon to a full workshop scene — is made with the same few decisions, so the set reads as one voice. The next three boards take one icon, one tool and one scene apart, step by step.

PALETTE	The brand's own: oxblood · graphite · foam · paper
ICON LINE	One heavy oxblood stroke, rounded ends
FILL	Paper and foam split light from shade
SHADOW	Rounded bars behind, rising at 35°
SCENES	Fine graphite line, solid masses, oxblood accents

01 · Geometry

03 · Light and shade

04 · Shadow bars

08 — ILLUSTRATION · ICON

THE LIGHT BULB

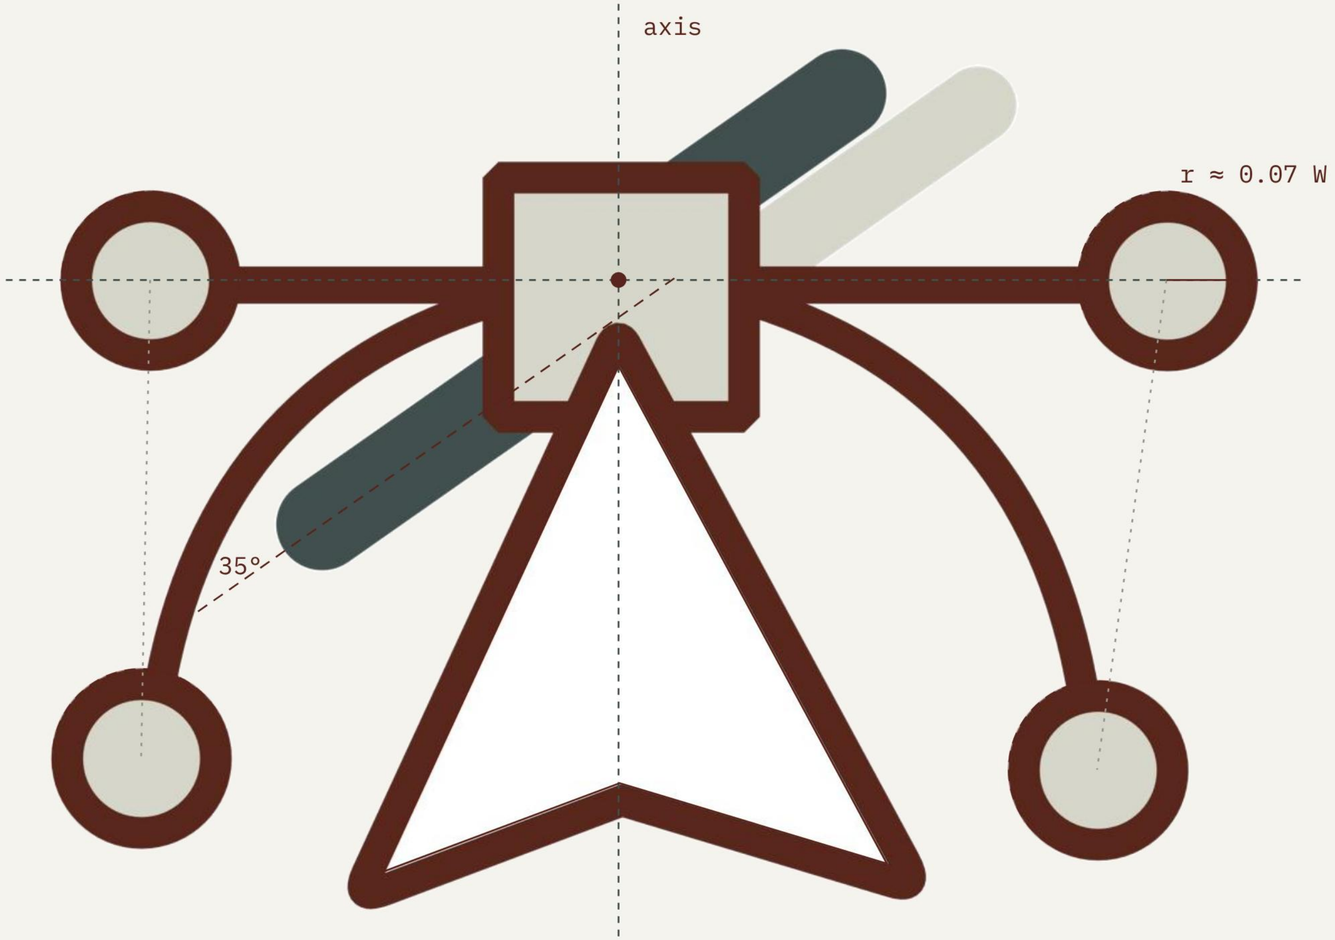

The idea, drawn in four passes. A circle sets the glass; five rays fan out from its centre; one line weight traces it all; the glass splits into light and shade on its axis; two bars slide in behind.

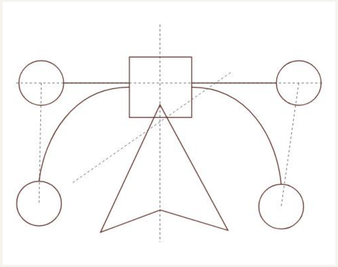

01 Glass on a circle of radius R. Five rays sit on radii of that circle, 18° apart.

02 One oxblood stroke, about 0.11 R, with rounded ends — glass, filament, neck and cap.

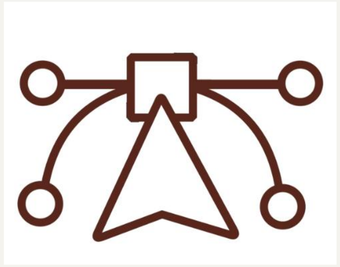

03 The glass is split on the vertical axis: paper on the lit side, foam on the shaded side.

04 Graphite and foam bars behind the bulb, rising at 35° — the family's shared shadow.

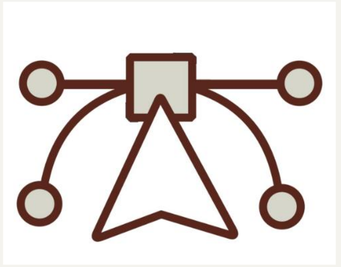

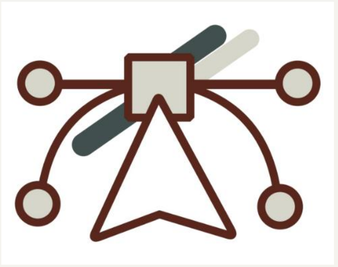

01 · Geometry

02 · One line weight

03 · Light and shade

04 · Shadow bars

09 — ILLUSTRATION · TOOL

THE PEN TOOL

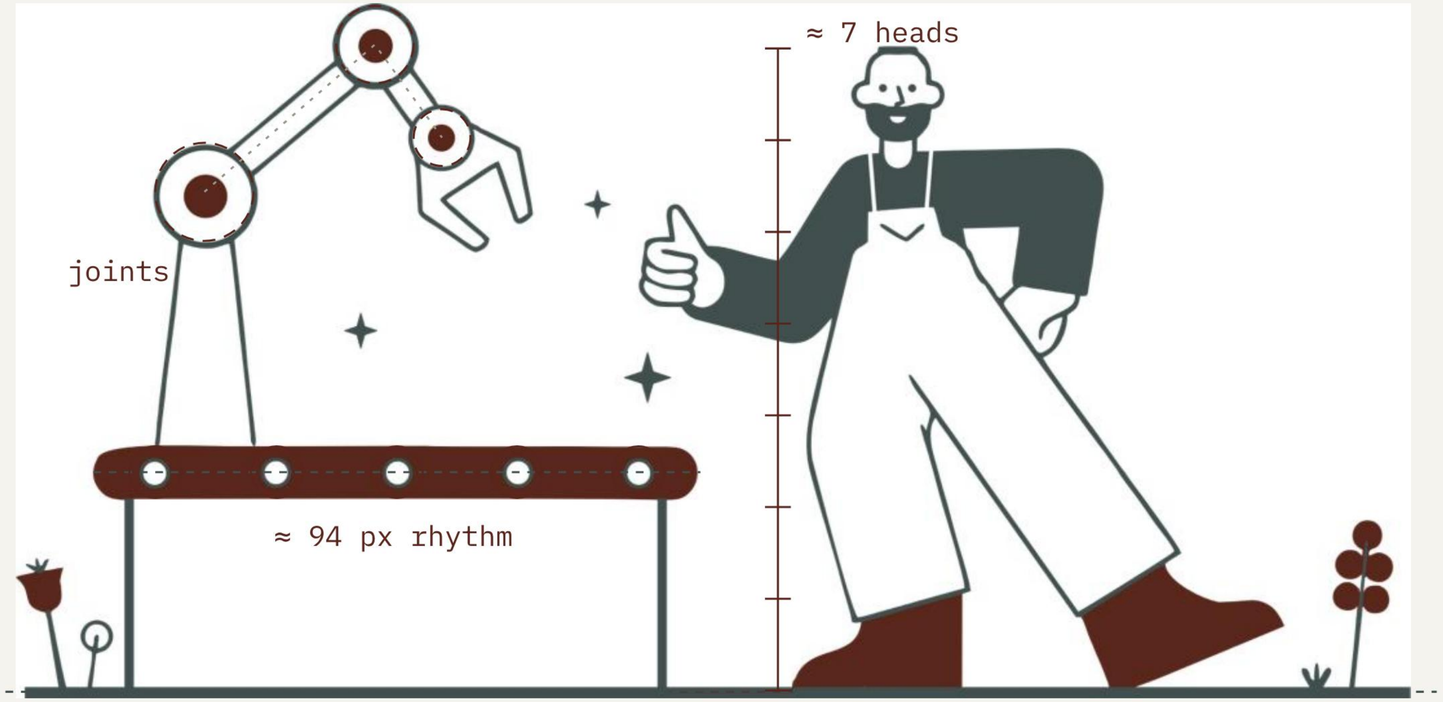

The designer's own instrument, drawn with the same rules as the bulb. A handle line and a centre axis come first; four equal nodes and the cursor hang from them; then line, fill and shadow follow in the family's order.

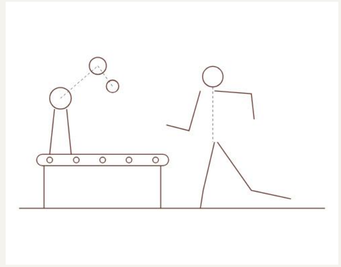

01 A horizontal handle line and a vertical axis. Four equal node circles, r ≈ 0.07 of the width, sit on its ends and corners.

02 The cursor is one triangle on the axis; the same heavy oxblood stroke traces it, the curve and the handles.

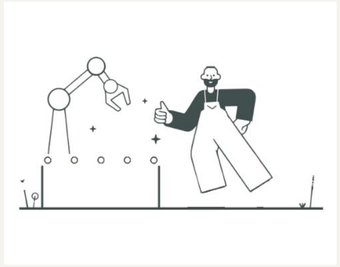

03 The cursor splits on its axis into paper and foam — light from one side, as in every icon.

04 Graphite and foam bars at 35° behind the nodes tie it back to the set.

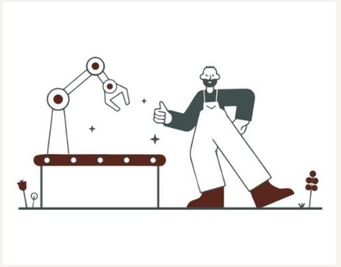

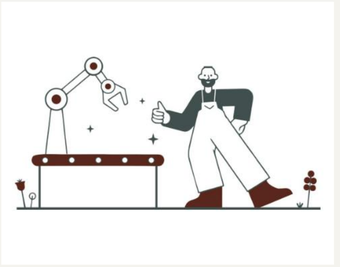

01 · Gesture and geometry

02 · Line and masses

03 · Oxblood accents

04 · Final scene

10 — ILLUSTRATION · SCENE

THE WORKSHOP

The scenes tell what the company does: a technician, a robot arm and a conveyor of cut foam. The same discipline holds at this scale — a ground line, a steady rhythm, a figure measured in heads — with oxblood kept for the places where work happens.

01 Gesture and geometry: a ground line, a conveyor with rollers on an even ≈ 94 px rhythm, the arm as three joint circles, the figure about seven heads tall.

02 A fine graphite line draws everything; solid graphite masses give weight to machine and clothing.

03 Oxblood only where things work — the arm's joints, the belt, the boots — so the eye goes to the action.

04 The finished scene, ready to sit beside the icons in print and on screen.
